(A) Reliance Industries Limited ("RIL") is the promoter of RRVL. The details of proceedings pending before SEBI against RIL are as under:

9.1. SEBI on August 8, 2014, passed an adjudication order on a show cause notice ("SCN") issued to RIL for alleged non-disclosure of the diluted earnings per share in the quarterly financial results for the quarters ended June, 2007, September, 2007, December, 2007, March, 2008, June, 2008 and September, 2008 (together, the "Quarterly Financial Results") and imposed a penalty of Rs. 13 crore. On an appeal by RIL, the Securities Appellate Tribunal set aside SEBI's order and remanded the matter for fresh consideration by SEBI. SEBI issued a fresh SCN dated April 5, 2016 in the matter, alleging that RIL did not disclose the correct diluted earnings per share in the Quarterly Financial Results. RIL filed a reply to the SCN and attended the personal hearing on July 26, 2016. SEBI has since appointed a new adjudicating officer ("AO"). The last hearing before the AO was held on November 22, 2018. Further details sought by the AO have been provided and the matter is pending.

9.2. RIL had issued debentures with convertible warrants in the year 1994 and allotted equity shares against the warrants in the year 2000. In this matter, SEBI had filed a complaint on July 16, 2020, against: (i) RIL; (ii) its then directors and certain persons belonging to the then promoter and promoter group of RIL (which includes Shri Mukesh D. Ambani, Shri Akash Ambani and Ms Isha Ambani, directors of Reliance Retail Ventures Limited); and (iii) others, before the Special Court, Mumbai, for taking cognizance of alleged

offences under Regulations 3, 5 and 6 of SEBI (Prohibition of Fraudulent and Unfair Trade Practices relating to Securities Market) Regulations, 1995, Regulation 11(1) of SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 1997, and section 77(2) and section 77A of Companies Act 1956. The Special Court, Mumbai, vide order dated September 30, 2020, dismissed SEBI's complaint as barred by limitation. Against the said order of the Special Court, SEBI has filed a revision application before the Hon'ble High Court, Bombay and the same is pending.

(B) The details of proceedings pending before SEBI against some of the directors of RRVL are as under:

9.3. In the same matter referred to in the Clause 9.2 of this Schedule, SEBI had also issued show cause notice dated February 24, 2011 ("SCN") to certain persons belonging to the then promoter and promoter group of RIL (which includes Shri Mukesh D. Ambani, Shri Akash Ambani and Ms Isha Ambani, directors of Reliance Retail Ventures Limited) for alleged violation of Regulation 11(1) of SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 1997 asking them to show cause why an inquiry should not be held against them in terms of Rule 4 of the SEBI (Procedure for Holding Inquiry and imposing Penalties by Adjudicating Officer) Rules, 1995 and penalty be not imposed under Section 15H of the SEBI Act, 1992 for the alleged contravention of Regulation 11(1) of SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 1997. The said SCN is in the process of being adjudicated by SEBI.

Further, though not pending before SEBI, for completeness, the following matters have been disclosed for information purposes only:

9.4. On December 16, 2010, SEBI issued a show cause notice ("SCN") to RIL and 12 other entities (together, the "Noticees") in connection with the trades by RIL in the stock exchanges in 2007 in the shares of Reliance Petroleum Limited, then a subsidiary of RIL. Hearings were held before the Whole Time Member ("WTM") of SEBI in respect of SCN. By an order dated March 24, 2017, the WTM of SEBI held that the actions of RIL and other 12 noticees constituted a violation of the provisions of section 12A of Securities and Exchange Board of India Act, 1992 read with regulations 3, 4(1) and 4(2)(e) of the SEBI (Prohibition of Fraudulent and Unfair Trade Practices relating to Securities Market) Regulations, 2003 and the other 12 noticees violated provisions of the SEBI circular No. SMDRP/DC/CIR-10/01 dated November 2, 2001 and NSE circular No. NSE/CMPT/2982 dated November 7, 2001. WTM passed the directions: (i) prohibiting the Noticees from dealing in equity derivatives in the 'Futures & Options' segment of stock exchanges, directly or indirectly, for a period of one year from the date of the order; and; (ii) to RIL to disgorge an amount of Rs. 447.27 crore along with interest at the rate of 12% per annum from November 29, 2007 till the date of payment. In May 2017, RIL and the other noticees filed an appeal before the Securities Appellate Tribunal ("SAT") against this order. SAT, by a majority order (2:1), dismissed the appeal on November 5, 2020 and directed RIL to pay the disgorged amount within sixty days from the date of the order. The appeal of RIL and other noticees has been admitted by the Hon'ble Supreme Court of India. By its order dated December 17, 2020, the Hon'ble Supreme Court of India has directed RIL to deposit Rs. 250 crore in the Investors' Protection Fund, subject to the final result of the appeal and has stayed the recovery of the balance, inclusive of interest, pending the appeal. RIL has complied with the order dated December 17, 2020 of the Hon'ble Supreme Court of India.

In the very same matter, on November 21, 2017, SEBI issued show cause notice, *inter alia*, to RIL and Shri Mukesh D. Ambani in his capacity as Managing Director of RIL, asking them to show cause as to why inquiry should not be held in terms of SEBI (Procedure for Holding Inquiry and Imposing Penalties by Adjudicating Officer) Rules, 1995 and penalty not be imposed under the provisions of the Securities and Exchange Board of India Act, 1992. The Adjudicating Officer of SEBI passed an order on January 1, 2021 imposing a penalty of Rs. 25 crore on RIL and Rs. 15 crore on Shri Mukesh D. Ambani.

APPROACH – BASIS OF AMALGAMATION

The Scheme contemplates the Proposed Amalgamation under Sections 230 to 232 of the Companies Act, 2013 and other relevant provisions of the Companies Act, 2013 and rules issued thereunder to the extent applicable.

Arriving at the Equity Share Exchange Ratio for the purposes of an amalgamation such as the Proposed Amalgamation, would require determining the relative values of each company involved and of their shares. These values are to be determined independently but on a relative basis, and without considering the effect of the merger.

The three main valuation approaches are the market approach, income approach and asset approach. There are several commonly used and accepted methods within the market approach, income approach and asset approach, for determining the relative fair value of equity shares of a company, which can be considered in the present valuation exercise, to the extent relevant and applicable, to arrive at the Equity Share Exchange Ratio for the purpose of the Proposed Amalgamation, such as:

1. Asset Approach - Net Asset Value (NAV) Method
2. Income Approach - Discounted Cash Flow (DCF) Method
3. Market Approach
 - Market Price Method
 - Comparable Companies Multiples (CCM) Method
 - Comparable Transactions Multiples (CTM) Method

It should be understood that the valuation of any company or its assets is inherently subjective and is subject to uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the companies. In addition, this valuation will fluctuate with changes in prevailing market conditions, the conditions and prospects, financial and otherwise, of the companies/businesses, and other factors which generally influence the valuation of companies and their assets.

The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of method of valuation has been arrived at using usual and conventional methods adopted for transactions of a similar nature and our reasonable judgment, in an independent and bona fide manner based on our previous experience of assignments of a similar nature.

Asset Approach - Net Asset Value Method

Under the asset approach, the net asset value method is considered, which is based on the underlying net assets and liabilities of the company, taking into account operating assets and liabilities on a book value basis and appropriate adjustments for, inter alia, value of surplus/ non-operating assets.

Income Approach: Income approach is a valuation approach that converts maintainable or future amounts (e.g., cash flows or income and expenses) to a single current (i.e., discounted or capitalised) amount. The value measurement is determined on the basis of the value indicated by current market expectations about those future amounts.

- **Discounted Cash Flow (DCF) Method:** Under this method, either:
 - the projected free cash flows from business operations available to all providers of capital are discounted at the weighted average cost of capital to such capital providers, on a market participant basis, and the sum of such discounted free cash flows is the value of the business from which value of debt and other capital is deducted, and other relevant adjustments made to arrive at the value of the equity – Free Cash Flows to Firm (FCFF) technique; This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and creditors), weighted by their relative contribution to the total capital of the company. The opportunity cost to the capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk; or
 - the projected free cash flows from business operations available to equity shareholders (after deducting cash flows attributable to the debt and other capital providers) are discounted at the cost of equity, on a market participant basis, and the sum of such discounted free cash flows, after making other relevant adjustments, is the value of the equity - Free Cash Flows to Equity (FCFE) technique. This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to the equity capital providers. The opportunity cost to the equity capital provider equals the rate of return such equity capital provider expects to earn on other investments of equivalent risk.

Market Approach: Market approach is a valuation approach that uses prices and other relevant information generated by market transactions involving identical or comparable (i.e., similar) assets, liabilities or a group of assets and liabilities, such as a business.

- **Market Price Method:** Under this method, the value of shares of a company is determined by taking the average of the market capitalisation of the equity shares of such company as quoted on a recognised stock exchange over reasonable periods of time where such quotations are arising from the shares being regularly and freely traded in an active market, subject to the element of speculative support that may be inbuilt in the market price. But there could be situations where the value of the share as quoted on the stock market would not be regarded as a proper index of the fair value of the share, especially where the market values are fluctuating in a volatile capital market. Further, in the case of an amalgamation, where there is a question of evaluating the shares of one company against those of another, the volume of transactions and the number of shares available for trading on the stock exchange over a reasonable period would have to be of a comparable standard. This method would also cover any other transactions in the shares of the company including primary/ preferential issues/ open offer in the shares of the company available in the public domain.

- **Comparable Companies Multiples (CCM) Method:** Under this method, one attempts to measure the value of the shares/ business of company by applying the derived market multiple based on market quotations of comparable public/ listed companies, in an active market, possessing attributes similar to the business of such company - to the relevant financial parameter of the company/ business (based on past and/ or projected working results) after making adjustments to the derived multiples on account of dissimilarities with the comparable companies and the strengths, weaknesses and other factors peculiar to the company being valued. These valuations are based on the principle that such market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.
- **Comparable Transactions Multiples (CTM) Method:** Under this method, one attempts to measure the value of the shares/ business of company by applying the market multiples of publicly disclosed transactions in similar space as the respective companies being evaluated. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

Out of the above methods, we have used approaches/ methods as considered appropriate. The valuation approaches/ methods used, and the values arrived at using such approaches/ methods by us have been tabled in the next section of this Report.

BASIS OF EQUITY SHARE EXCHANGE RATIO

The basis of the Proposed Amalgamation would have to be determined after taking into consideration all the factors, approaches and methods considered appropriate by the Valuers. Though different values have been arrived at under each of the above approaches/ methods, for the purposes of recommending the Equity Share Exchange Ratio it is necessary to arrive at a single value for the shares of the companies involved in an amalgamation such as the Proposed Amalgamation. It is however important to note that in doing so, we are not attempting to arrive at the absolute values of the shares of the companies but at their relative values to facilitate the determination of an Equity Share Exchange Ratio. For this purpose, it is necessary to give appropriate weights to the values arrived at under each approach/ method.

In the ultimate analysis, valuation will have to be arrived at by the exercise of judicious discretion by the valuer and judgments taking into account all the relevant factors. There will always be several factors, e.g. quality of the management, present and prospective competition, yield on comparable securities and market sentiment, etc. which are not evident from the face of the balance sheet but which will strongly influence the worth of a share.

The determination of an exchange ratio is not a precise science and the conclusions arrived at in many cases will, of necessity, be subjective and dependent on the exercise of individual judgment. This concept is also recognized in judicial decisions. There is, therefore, no indisputable single exchange ratio. While we have provided our recommendation of the Equity Share Exchange Ratio based on the information available to us and within the scope and constraints of our engagement, others may have a different opinion as to the Equity Share Exchange Ratio of the equity shares of FEL and the respective Part A Companies. The final responsibility for the determination of the exchange ratio at which the Proposed Amalgamation shall take place will be with the Board of Directors of the respective Part A Companies who should take into account other factors such as their own assessment of the Proposed Amalgamation and input of other advisors.

The Equity Share Exchange Ratio has been arrived at on the basis of a relative equity valuation of FEL and the respective Part A Companies based on the various approaches/ methods explained herein earlier and various qualitative factors relevant to each company and the business dynamics and growth potentials of the businesses of these companies, having regard to information base, key underlying assumptions and limitations.

We have independently applied methods discussed above, as considered appropriate, and arrived at their assessment of the relative values per equity share of FEL and the respective Part A Companies. To arrive at the consensus on the Equity Share Exchange Ratio for the Proposed Amalgamation, suitable minor adjustments/ rounding off has been done in the relative values arrived at.

In light of the above, and on a consideration of all the relevant factors and circumstances as discussed and outlined herein above, we recommend the following Equity Share Exchange Ratio for the Proposed Amalgamation whose computation is as under:

The Computation of Equity Share Exchange Ratio as derived by BSR, is given below:

| Valuation Approach | Future Consumer Limited | | Future Enterprises Limited | |
|-------------------------------------|-------------------------|-------------|----------------------------|-------------|
| | Value per Share (INR) | Weight | Value per Share (INR) | Weight |
| Income Approach | 13.59 | 50% | 12.79 | 50% |
| Market Approach (Market Price) | 8.31 | 25% | 11.56 | 25% |
| Market Approach (CCM) | 11.05 | 25% | 14.39 | 25% |
| Relative Value per Share | 11.64 | 100% | 12.88 | 100% |
| Exchange Ratio (rounded off) | 0.9 | | | |

Note:

(1) The scope carried out by BSR was based on the projections provided for Part A Companies only. Any other company, if included as a part of the Proposed Amalgamation is not in our scope of work and, based on instructions from the Client, have been considered at nil value. Accordingly any such companies, do not impact the Equity Share Exchange Ratio.

(2) The Equity Share Exchange Ratio has been arrived at, after considering Class B (Series 1) shares of FEL, as well as ESOPs of the respective companies, where the exercise price was below the market price.

Valuer's Notes:

For the present valuation analysis, we have considered it appropriate to apply the Income Approach and the Market Approach (Market Price and CCM), to arrive at the relative fair value of the equity shares of the companies for the purpose of the Proposed Amalgamation.

In the current analysis, the amalgamation of the companies is proceeded with on the assumption that the companies would merge as going concerns (subject to the implementation of the composite scheme of merger) and an actual realization of the operating assets is not contemplated. The operating assets have therefore been considered at their book and non-operating/ surplus assets, if any at their fair values under the Asset Approach. In such a going concern scenario, the relative earning power, as reflected under the Income and Market approaches, is of greater importance to the basis of amalgamation/ merger, with the values arrived at on the net asset basis being of limited relevance. Hence, the Asset Approach has not been considered in arriving at the Equity Share Exchange Ratio.

Given the nature of the businesses of the companies and the fact that we have been provided by the Part A Companies with their projected financials, we have considered it appropriate to apply the DCF Method under the Income Approach to arrive at the relative fair value of the shares of the Part A Companies for the purpose of arriving at the Equity Share Exchange Ratio.

In the present case, the equity shares of both the companies, FEL and FCL, are listed on BSE and NSE. Please note that for Market Price Method, we have considered market price movements till 10 June 2020 given that there has been significant movement in share price for Part A Companies on account of market speculations of this transaction post this date. We have also applied the CCM Method under the Market Approach to arrive at the relative fair value of the shares for the purpose of arriving at the Equity Share Exchange Ratio.

Similarly, in the absence of any comparable transactions similar to the companies being evaluated as a part of this Report, the Market Approach (CTM) has not been considered in arriving at the Equity Share Exchange Ratio.

Ratio:

In light of the above, and on a consideration of all the relevant factors and circumstances as discussed and outlined herein above, we recommend the following Equity Share Exchange Ratio for the Proposed Amalgamation:

9 (Nine only) equity share of FEL of INR 2/- each fully paid up for every 10 (Ten only) equity shares of FCL of INR 6/- each fully paid up.

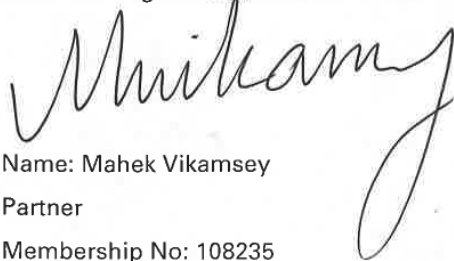

Our Valuation Report and Equity Share Exchange Ratio is based on the equity share capital structure of FEL and the respective Part A Companies as mentioned earlier in this Report. Any variation in the equity capital of FEL and the respective Part A Companies may have material impact on the Equity Share Exchange Ratio.

APPROACH – BASIS OF AMALGAMATION

The Scheme contemplates the Proposed Amalgamation under Sections 230 to 232 of the Companies Act, 2013 and other relevant provisions of the Companies Act, 2013 and rules issued thereunder to the extent applicable.

Arriving at the Equity Share Exchange Ratio for the purposes of an amalgamation such as the Proposed Amalgamation, would require determining the relative values of each company involved and of their shares. These values are to be determined independently but on a relative basis, and without considering the effect of the merger.

The three main valuation approaches are the market approach, income approach and asset approach. There are several commonly used and accepted methods within the market approach, income approach and asset approach, for determining the relative fair value of equity shares of a company, which can be considered in the present valuation exercise, to the extent relevant and applicable, to arrive at the Equity Share Exchange Ratio for the purpose of the Proposed Amalgamation, such as:

1. Asset Approach - Net Asset Value (NAV) Method
2. Income Approach - Discounted Cash Flow (DCF) Method
3. Market Approach
 - Market Price Method
 - Comparable Companies Multiples (CCM) Method
 - Comparable Transactions Multiples (CTM) Method

It should be understood that the valuation of any company or its assets is inherently subjective and is subject to uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the companies. In addition, this valuation will fluctuate with changes in prevailing market conditions, the conditions and prospects, financial and otherwise, of the companies/businesses, and other factors which generally influence the valuation of companies and their assets.

The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of method of valuation has been arrived at using usual and conventional methods adopted for transactions of a similar nature and our reasonable judgment, in an independent and bona fide manner based on our previous experience of assignments of a similar nature.

Asset Approach - Net Asset Value Method

Under the asset approach, the net asset value method is considered, which is based on the underlying net assets and liabilities of the company, taking into account operating assets and liabilities on a book value basis and appropriate adjustments for, inter alia, value of surplus/ non-operating assets.

Income Approach: Income approach is a valuation approach that converts maintainable or future amounts (e.g., cash flows or income and expenses) to a single current (i.e., discounted or capitalised) amount. The value measurement is determined on the basis of the value indicated by current market expectations about those future amounts.

- **Discounted Cash Flow (DCF) Method:** Under this method, either:
 - the projected free cash flows from business operations available to all providers of capital are discounted at the weighted average cost of capital to such capital providers, on a market participant basis, and the sum of such discounted free cash flows is the value of the business from which value of debt and other capital is deducted, and other relevant adjustments made to arrive at the value of the equity – Free Cash Flows to Firm (FCFF) technique; This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and creditors), weighted by their relative contribution to the total capital of the company. The opportunity cost to the capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk; or
 - the projected free cash flows from business operations available to equity shareholders (after deducting cash flows attributable to the debt and other capital providers) are discounted at the cost of equity, on a market participant basis, and the sum of such discounted free cash flows, after making other relevant adjustments, is the value of the equity - Free Cash Flows to Equity (FCFE) technique. This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to the equity capital providers. The opportunity cost to the equity capital provider equals the rate of return such equity capital provider expects to earn on other investments of equivalent risk.

Market Approach: Market approach is a valuation approach that uses prices and other relevant information generated by market transactions involving identical or comparable (i.e., similar) assets, liabilities or a group of assets and liabilities, such as a business.

- **Market Price Method:** Under this method, the value of shares of a company is determined by taking the average of the market capitalisation of the equity shares of such company as quoted on a recognised stock exchange over reasonable periods of time where such quotations are arising from the shares being regularly and freely traded in an active market, subject to the element of speculative support that may be inbuilt in the market price. But there could be situations where the value of the share as quoted on the stock market would not be regarded as a proper index of the fair value of the share, especially where the market values are fluctuating in a volatile capital market. Further, in the case of an amalgamation, where there is a question of evaluating the shares of one company against those of another, the volume of transactions and the number of shares available for trading on the stock exchange over a reasonable period would have to be of a comparable standard. This method would also cover any other transactions in the shares of the company including primary/ preferential issues/ open offer in the shares of the company available in the public domain.

- **Comparable Companies Multiples (CCM) Method:** Under this method, one attempts to measure the value of the shares/ business of company by applying the derived market multiple based on market quotations of comparable public/ listed companies, in an active market, possessing attributes similar to the business of such company - to the relevant financial parameter of the company/ business (based on past and/ or projected working results) after making adjustments to the derived multiples on account of dissimilarities with the comparable companies and the strengths, weaknesses and other factors peculiar to the company being valued. These valuations are based on the principle that such market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.
- **Comparable Transactions Multiples (CTM) Method:** Under this method, one attempts to measure the value of the shares/ business of company by applying the market multiples of publicly disclosed transactions in similar space as the respective companies being evaluated. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

Out of the above methods, we have used approaches/ methods as considered appropriate. The valuation approaches/ methods used, and the values arrived at using such approaches/ methods by us have been tabled in the next section of this Report.

BASIS OF EQUITY SHARE EXCHANGE RATIO

The basis of the Proposed Amalgamation would have to be determined after taking into consideration all the factors, approaches and methods considered appropriate by the Valuers. Though different values have been arrived at under each of the above approaches/ methods, for the purposes of recommending the Equity Share Exchange Ratio it is necessary to arrive at a single value for the shares of the companies involved in an amalgamation such as the Proposed Amalgamation. It is however important to note that in doing so, we are not attempting to arrive at the absolute values of the shares of the companies but at their relative values to facilitate the determination of an Equity Share Exchange Ratio. For this purpose, it is necessary to give appropriate weights to the values arrived at under each approach/ method.

In the ultimate analysis, valuation will have to be arrived at by the exercise of judicious discretion by the valuer and judgments taking into account all the relevant factors. There will always be several factors, e.g. quality of the management, present and prospective competition, yield on comparable securities and market sentiment, etc. which are not evident from the face of the balance sheet but which will strongly influence the worth of a share.

The determination of an exchange ratio is not a precise science and the conclusions arrived at in many cases will, of necessity, be subjective and dependent on the exercise of individual judgment. This concept is also recognized in judicial decisions. There is, therefore, no indisputable single exchange ratio. While we have provided our recommendation of the Equity Share Exchange Ratio based on the information available to us and within the scope and constraints of our engagement, others may have a different opinion as to the Equity Share Exchange Ratio of the equity shares of FEL and the respective Part A Companies. The final responsibility for the determination of the exchange ratio at which the Proposed Amalgamation shall take place will be with the Board of Directors of the respective Part A Companies who should take into account other factors such as their own assessment of the Proposed Amalgamation and input of other advisors.

The Equity Share Exchange Ratio has been arrived at on the basis of a relative equity valuation of FEL and the respective Part A Companies based on the various approaches/ methods explained herein earlier and various qualitative factors relevant to each company and the business dynamics and growth potentials of the businesses of these companies, having regard to information base, key underlying assumptions and limitations.

We have independently applied methods discussed above, as considered appropriate, and arrived at their assessment of the relative values per equity share of FEL and the respective Part A Companies. To arrive at the consensus on the Equity Share Exchange Ratio for the Proposed Amalgamation, suitable minor adjustments/ rounding off has been done in the relative values arrived at.

In light of the above, and on a consideration of all the relevant factors and circumstances as discussed and outlined herein above, we recommend the following Equity Share Exchange Ratio for the Proposed Amalgamation whose computation is as under:

The Computation of Equity Share Exchange Ratio as derived by BSR, is given below:

| Valuation Approach | Future Lifestyle Fashions Limited | | Future Enterprises Limited | |
|-------------------------------------|-----------------------------------|-------------|----------------------------|-------------|
| | Value per Share (INR) | Weight | Value per Share (INR) | Weight |
| Income Approach | 133.41 | 50% | 12.79 | 50% |
| Market Approach (Market Price) | 146.97 | 25% | 11.56 | 25% |
| Market Approach (CCM) | 185.97 | 25% | 14.39 | 25% |
| Relative Value per Share | 149.94 | 100% | 12.88 | 100% |
| Exchange Ratio (rounded off) | | | 11.6 | |

Note:

(1) The scope carried out by BSR was based on the projections provided for Part A Companies only. Any other company, if included as a part of the Proposed Amalgamation is not in our scope of work and, based on instructions from the Client, have been considered at nil value. Accordingly any such companies, do not impact the Equity Share Exchange Ratio.

(2) The Equity Share Exchange Ratio has been arrived at, after considering Class B (Series 1) shares of FEL, as well as ESOPs of the respective companies, where the exercise price was below the market price.

Valuer's Notes:

For the present valuation analysis, we have considered it appropriate to apply the Income Approach and the Market Approach (Market Price and CCM), to arrive at the relative fair value of the equity shares of the companies for the purpose of the Proposed Amalgamation.

In the current analysis, the amalgamation of the companies is proceeded with on the assumption that the companies would merge as going concerns (subject to the implementation of the composite scheme of merger) and an actual realization of the operating assets is not contemplated. The operating assets have therefore been considered at their book and non-operating/ surplus assets, if any at their fair values under the Asset Approach. In such a going concern scenario, the relative earning power, as reflected under the Income and Market approaches, is of greater importance to the basis of amalgamation/ merger, with the values arrived at on the net asset basis being of limited relevance. Hence, the Asset Approach has not been considered in arriving at the Equity Share Exchange Ratio.

Given the nature of the businesses of the companies and the fact that we have been provided by the Part A Companies with their projected financials, we have considered it appropriate to apply the DCF Method under the Income Approach to arrive at the relative fair value of the shares of the Part A Companies for the purpose of arriving at the Equity Share Exchange Ratio.

In the present case, the equity shares of both the companies, FEL and FCL, are listed on BSE and NSE. Please note that for Market Price Method, we have considered market price movements till 10 June 2020 given that there has been significant movement in share price for Part A Companies on account of market speculations of this transaction post this date. We have also applied the CCM Method under the Market Approach to arrive at the relative fair value of the shares for the purpose of arriving at the Equity Share Exchange Ratio.

Similarly, in the absence of any comparable transactions similar to the companies being evaluated as a part of this Report, the Market Approach (CTM) has not been considered in arriving at the Equity Share Exchange Ratio.

Ratio:

In light of the above, and on a consideration of all the relevant factors and circumstances as discussed and outlined herein above, we recommend the following Equity Share Exchange Ratio for the Proposed Amalgamation:

116 (One hundred and sixteen only) equity share of FEL of INR 2/- each fully paid up for every 10 (Ten only) equity shares of FLFL of INR 2/- each fully paid up.

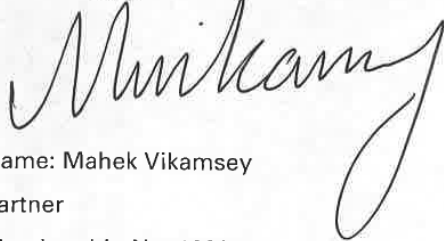

Our Valuation Report and Equity Share Exchange Ratio is based on the equity share capital structure of FEL and the respective Part A Companies as mentioned earlier in this Report. Any variation in the equity capital of FEL and the respective Part A Companies may have material impact on the Equity Share Exchange Ratio.

APPROACH – BASIS OF AMALGAMATION

The Scheme contemplates the Proposed Amalgamation under Sections 230 to 232 of the Companies Act, 2013 and other relevant provisions of the Companies Act, 2013 and rules issued thereunder to the extent applicable.

Arriving at the Equity Share Exchange Ratio for the purposes of an amalgamation such as the Proposed Amalgamation, would require determining the relative values of each company involved and of their shares. These values are to be determined independently but on a relative basis, and without considering the effect of the merger.

The three main valuation approaches are the market approach, income approach and asset approach. There are several commonly used and accepted methods within the market approach, income approach and asset approach, for determining the relative fair value of equity shares of a company, which can be considered in the present valuation exercise, to the extent relevant and applicable, to arrive at the Equity Share Exchange Ratio for the purpose of the Proposed Amalgamation, such as:

1. Asset Approach - Net Asset Value (NAV) Method
2. Income Approach - Discounted Cash Flow (DCF) Method
3. Market Approach
 - Market Price Method
 - Comparable Companies Multiples (CCM) Method
 - Comparable Transactions Multiples (CTM) Method

It should be understood that the valuation of any company or its assets is inherently subjective and is subject to uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the companies. In addition, this valuation will fluctuate with changes in prevailing market conditions, the conditions and prospects, financial and otherwise, of the companies/businesses, and other factors which generally influence the valuation of companies and their assets.

The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of method of valuation has been arrived at using usual and conventional methods adopted for transactions of a similar nature and our reasonable judgment, in an independent and bona fide manner based on our previous experience of assignments of a similar nature.

Asset Approach - Net Asset Value Method

Under the asset approach, the net asset value method is considered, which is based on the underlying net assets and liabilities of the company, taking into account operating assets and liabilities on a book value basis and appropriate adjustments for, inter alia, value of surplus/ non-operating assets.

Income Approach: Income approach is a valuation approach that converts maintainable or future amounts (e.g., cash flows or income and expenses) to a single current (i.e., discounted or capitalised) amount. The value measurement is determined on the basis of the value indicated by current market expectations about those future amounts.

- **Discounted Cash Flow (DCF) Method:** Under this method, either:
 - the projected free cash flows from business operations available to all providers of capital are discounted at the weighted average cost of capital to such capital providers, on a market participant basis, and the sum of such discounted free cash flows is the value of the business from which value of debt and other capital is deducted, and other relevant adjustments made to arrive at the value of the equity – Free Cash Flows to Firm (FCFF) technique; This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and creditors), weighted by their relative contribution to the total capital of the company. The opportunity cost to the capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk; or
 - the projected free cash flows from business operations available to equity shareholders (after deducting cash flows attributable to the debt and other capital providers) are discounted at the cost of equity, on a market participant basis, and the sum of such discounted free cash flows, after making other relevant adjustments, is the value of the equity - Free Cash Flows to Equity (FCFE) technique. This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to the equity capital providers. The opportunity cost to the equity capital provider equals the rate of return such equity capital provider expects to earn on other investments of equivalent risk.

Market Approach: Market approach is a valuation approach that uses prices and other relevant information generated by market transactions involving identical or comparable (i.e., similar) assets, liabilities or a group of assets and liabilities, such as a business.

- **Market Price Method:** Under this method, the value of shares of a company is determined by taking the average of the market capitalisation of the equity shares of such company as quoted on a recognised stock exchange over reasonable periods of time where such quotations are arising from the shares being regularly and freely traded in an active market, subject to the element of speculative support that may be inbuilt in the market price. But there could be situations where the value of the share as quoted on the stock market would not be regarded as a proper index of the fair value of the share, especially where the market values are fluctuating in a volatile capital market. Further, in the case of an amalgamation, where there is a question of evaluating the shares of one company against those of another, the volume of transactions and the number of shares available for trading on the stock exchange over a reasonable period would have to be of a comparable standard. This method would also cover any other transactions in the shares of the company including primary/ preferential issues/ open offer in the shares of the company available in the public domain.

- **Comparable Companies Multiples (CCM) Method:** Under this method, one attempts to measure the value of the shares/ business of company by applying the derived market multiple based on market quotations of comparable public/ listed companies, in an active market, possessing attributes similar to the business of such company - to the relevant financial parameter of the company/ business (based on past and/ or projected working results) after making adjustments to the derived multiples on account of dissimilarities with the comparable companies and the strengths, weaknesses and other factors peculiar to the company being valued. These valuations are based on the principle that such market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.
- **Comparable Transactions Multiples (CTM) Method:** Under this method, one attempts to measure the value of the shares/ business of company by applying the market multiples of publicly disclosed transactions in similar space as the respective companies being evaluated. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

Out of the above methods, we have used approaches/ methods as considered appropriate. The valuation approaches/ methods used, and the values arrived at using such approaches/ methods by us have been tabled in the next section of this Report.

BASIS OF EQUITY SHARE EXCHANGE RATIO

The basis of the Proposed Amalgamation would have to be determined after taking into consideration all the factors, approaches and methods considered appropriate by the Valuers. Though different values have been arrived at under each of the above approaches/ methods, for the purposes of recommending the Equity Share Exchange Ratio it is necessary to arrive at a single value for the shares of the companies involved in an amalgamation such as the Proposed Amalgamation. It is however important to note that in doing so, we are not attempting to arrive at the absolute values of the shares of the companies but at their relative values to facilitate the determination of an Equity Share Exchange Ratio. For this purpose, it is necessary to give appropriate weights to the values arrived at under each approach/ method.

In the ultimate analysis, valuation will have to be arrived at by the exercise of judicious discretion by the valuer and judgments taking into account all the relevant factors. There will always be several factors, e.g. quality of the management, present and prospective competition, yield on comparable securities and market sentiment, etc. which are not evident from the face of the balance sheet but which will strongly influence the worth of a share.

The determination of an exchange ratio is not a precise science and the conclusions arrived at in many cases will, of necessity, be subjective and dependent on the exercise of individual judgment. This concept is also recognized in judicial decisions. There is, therefore, no indisputable single exchange ratio. While we have provided our recommendation of the Equity Share Exchange Ratio based on the information available to us and within the scope and constraints of our engagement, others may have a different opinion as to the Equity Share Exchange Ratio of the equity shares of FEL and the respective Part A Companies. The final responsibility for the determination of the exchange ratio at which the Proposed Amalgamation shall take place will be with the Board of Directors of the respective Part A Companies who should take into account other factors such as their own assessment of the Proposed Amalgamation and input of other advisors.

The Equity Share Exchange Ratio has been arrived at on the basis of a relative equity valuation of FEL and the respective Part A Companies based on the various approaches/ methods explained herein earlier and various qualitative factors relevant to each company and the business dynamics and growth potentials of the businesses of these companies, having regard to information base, key underlying assumptions and limitations.

We have independently applied methods discussed above, as considered appropriate, and arrived at their assessment of the relative values per equity share of FEL and the respective Part A Companies. To arrive at the consensus on the Equity Share Exchange Ratio for the Proposed Amalgamation, suitable minor adjustments/ rounding off has been done in the relative values arrived at.

In light of the above, and on a consideration of all the relevant factors and circumstances as discussed and outlined herein above, we recommend the following Equity Share Exchange Ratio for the Proposed Amalgamation whose computation is as under:

The Computation of Equity Share Exchange Ratio as derived by BSR, is given below:

| Valuation Approach | Future Market Network Limited | | Future Enterprises Limited | |
|-------------------------------------|-------------------------------|-------------|----------------------------|-------------|
| | Value per Share (INR) | Weight | Value per Share (INR) | Weight |
| Income Approach | 21.68 | 50% | 12.79 | 50% |
| Market Approach (Market Price) | 15.01 | 25% | 11.56 | 25% |
| Market Approach (CCM) | 36.44 | 25% | 14.39 | 25% |
| Relative Value per Share | 23.70 | 100% | 12.88 | 100% |
| Exchange Ratio (rounded off) | | | 1.8 | |

Note:

(1) The scope carried out by BSR was based on the projections provided for Part A Companies only. Any other company, if included as a part of the Proposed Amalgamation is not in our scope of work and, based on instructions from the Client, have been considered at nil value. Accordingly any such companies, do not impact the Equity Share Exchange Ratio.

(2) The Equity Share Exchange Ratio has been arrived at, after considering Class B (Series 1) shares of FEL, as well as ESOPs of the respective companies, where the exercise price was below the market price.

Valuer's Notes:

For the present valuation analysis, we have considered it appropriate to apply the Income Approach and the Market Approach (Market Price and CCM), to arrive at the relative fair value of the equity shares of the companies for the purpose of the Proposed Amalgamation.

In the current analysis, the amalgamation of the companies is proceeded with on the assumption that the companies would merge as going concerns (subject to the implementation of the composite scheme of merger) and an actual realization of the operating assets is not contemplated. The operating assets have therefore been considered at their book and non-operating/ surplus assets, if any at their fair values under the Asset Approach. In such a going concern scenario, the relative earning power, as reflected under the Income and Market approaches, is of greater importance to the basis of amalgamation/ merger, with the values arrived at on the net asset basis being of limited relevance. Hence, the Asset Approach has not been considered in arriving at the Equity Share Exchange Ratio.

Given the nature of the businesses of the companies and the fact that we have been provided by the Part A Companies with their projected financials, we have considered it appropriate to apply the DCF Method under the Income Approach to arrive at the relative fair value of the shares of the Part A Companies for the purpose of arriving at the Equity Share Exchange Ratio.

In the present case, the equity shares of both the companies, FEL and FCL, are listed on BSE and NSE. Please note that for Market Price Method, we have considered market price movements till 10 June 2020 given that there has been significant movement in share price for Part A Companies on account of market speculations of this transaction post this date. We have also applied the CCM Method under the Market Approach to arrive at the relative fair value of the shares for the purpose of arriving at the Equity Share Exchange Ratio.

Similarly, in the absence of any comparable transactions similar to the companies being evaluated as a part of this Report, the Market Approach (CTM) has not been considered in arriving at the Equity Share Exchange Ratio.

Ratio:

In light of the above, and on a consideration of all the relevant factors and circumstances as discussed and outlined herein above, we recommend the following Equity Share Exchange Ratio for the Proposed Amalgamation:

18 (Eighteen only) equity share of FEL of INR 2/- each fully paid up for every 10 (Ten only) equity shares of FMNL of INR 10/- each fully paid up.

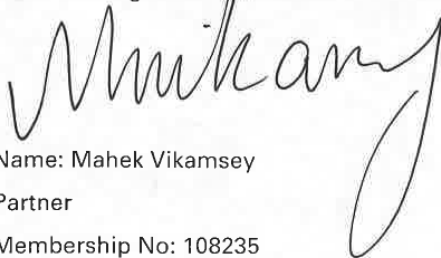

Our Valuation Report and Equity Share Exchange Ratio is based on the equity share capital structure of FEL and the respective Part A Companies as mentioned earlier in this Report. Any variation in the equity capital of FEL and the respective Part A Companies may have material impact on the Equity Share Exchange Ratio.

APPROACH – BASIS OF AMALGAMATION

The Scheme contemplates the Proposed Amalgamation under Sections 230 to 232 of the Companies Act, 2013 and other relevant provisions of the Companies Act, 2013 and rules issued thereunder to the extent applicable.

Arriving at the Equity Share Exchange Ratio for the purposes of an amalgamation such as the Proposed Amalgamation, would require determining the relative values of each company involved and of their shares. These values are to be determined independently but on a relative basis, and without considering the effect of the merger.

The three main valuation approaches are the market approach, income approach and asset approach. There are several commonly used and accepted methods within the market approach, income approach and asset approach, for determining the relative fair value of equity shares of a company, which can be considered in the present valuation exercise, to the extent relevant and applicable, to arrive at the Equity Share Exchange Ratio for the purpose of the Proposed Amalgamation, such as:

1. Asset Approach - Net Asset Value (NAV) Method
2. Income Approach - Discounted Cash Flow (DCF) Method
3. Market Approach
 - Market Price Method
 - Comparable Companies Multiples (CCM) Method
 - Comparable Transactions Multiples (CTM) Method

It should be understood that the valuation of any company or its assets is inherently subjective and is subject to uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the companies. In addition, this valuation will fluctuate with changes in prevailing market conditions, the conditions and prospects, financial and otherwise, of the companies/businesses, and other factors which generally influence the valuation of companies and their assets.

The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of method of valuation has been arrived at using usual and conventional methods adopted for transactions of a similar nature and our reasonable judgment, in an independent and bona fide manner based on our previous experience of assignments of a similar nature.

Asset Approach - Net Asset Value Method

Under the asset approach, the net asset value method is considered, which is based on the underlying net assets and liabilities of the company, taking into account operating assets and liabilities on a book value basis and appropriate adjustments for, inter alia, value of surplus/ non-operating assets.

Income Approach: Income approach is a valuation approach that converts maintainable or future amounts (e.g., cash flows or income and expenses) to a single current (i.e., discounted or capitalised) amount. The value measurement is determined on the basis of the value indicated by current market expectations about those future amounts.

- **Discounted Cash Flow (DCF) Method:** Under this method, either:
 - the projected free cash flows from business operations available to all providers of capital are discounted at the weighted average cost of capital to such capital providers, on a market participant basis, and the sum of such discounted free cash flows is the value of the business from which value of debt and other capital is deducted, and other relevant adjustments made to arrive at the value of the equity – Free Cash Flows to Firm (FCFF) technique; This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and creditors), weighted by their relative contribution to the total capital of the company. The opportunity cost to the capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk; or
 - the projected free cash flows from business operations available to equity shareholders (after deducting cash flows attributable to the debt and other capital providers) are discounted at the cost of equity, on a market participant basis, and the sum of such discounted free cash flows, after making other relevant adjustments, is the value of the equity - Free Cash Flows to Equity (FCFE) technique. This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to the equity capital providers. The opportunity cost to the equity capital provider equals the rate of return such equity capital provider expects to earn on other investments of equivalent risk.

Market Approach: Market approach is a valuation approach that uses prices and other relevant information generated by market transactions involving identical or comparable (i.e., similar) assets, liabilities or a group of assets and liabilities, such as a business.

- **Market Price Method:** Under this method, the value of shares of a company is determined by taking the average of the market capitalisation of the equity shares of such company as quoted on a recognised stock exchange over reasonable periods of time where such quotations are arising from the shares being regularly and freely traded in an active market, subject to the element of speculative support that may be inbuilt in the market price. But there could be situations where the value of the share as quoted on the stock market would not be regarded as a proper index of the fair value of the share, especially where the market values are fluctuating in a volatile capital market. Further, in the case of an amalgamation, where there is a question of evaluating the shares of one company against those of another, the volume of transactions and the number of shares available for trading on the stock exchange over a reasonable period would have to be of a comparable standard. This method would also cover any other transactions in the shares of the company including primary/ preferential issues/ open offer in the shares of the company available in the public domain.

- **Comparable Companies Multiples (CCM) Method:** Under this method, one attempts to measure the value of the shares/ business of company by applying the derived market multiple based on market quotations of comparable public/ listed companies, in an active market, possessing attributes similar to the business of such company - to the relevant financial parameter of the company/ business (based on past and/ or projected working results) after making adjustments to the derived multiples on account of dissimilarities with the comparable companies and the strengths, weaknesses and other factors peculiar to the company being valued. These valuations are based on the principle that such market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.
- **Comparable Transactions Multiples (CTM) Method:** Under this method, one attempts to measure the value of the shares/ business of company by applying the market multiples of publicly disclosed transactions in similar space as the respective companies being evaluated. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

Out of the above methods, we have used approaches/ methods as considered appropriate. The valuation approaches/ methods used, and the values arrived at using such approaches/ methods by us have been tabled in the next section of this Report.

BASIS OF EQUITY SHARE EXCHANGE RATIO

The basis of the Proposed Amalgamation would have to be determined after taking into consideration all the factors, approaches and methods considered appropriate by the Valuers. Though different values have been arrived at under each of the above approaches/ methods, for the purposes of recommending the Equity Share Exchange Ratio it is necessary to arrive at a single value for the shares of the companies involved in an amalgamation such as the Proposed Amalgamation. It is however important to note that in doing so, we are not attempting to arrive at the absolute values of the shares of the companies but at their relative values to facilitate the determination of an Equity Share Exchange Ratio. For this purpose, it is necessary to give appropriate weights to the values arrived at under each approach/ method.

In the ultimate analysis, valuation will have to be arrived at by the exercise of judicious discretion by the valuer and judgments taking into account all the relevant factors. There will always be several factors, e.g. quality of the management, present and prospective competition, yield on comparable securities and market sentiment, etc. which are not evident from the face of the balance sheet but which will strongly influence the worth of a share.

The determination of an exchange ratio is not a precise science and the conclusions arrived at in many cases will, of necessity, be subjective and dependent on the exercise of individual judgment. This concept is also recognized in judicial decisions. There is, therefore, no indisputable single exchange ratio. While we have provided our recommendation of the Equity Share Exchange Ratio based on the information available to us and within the scope and constraints of our engagement, others may have a different opinion as to the Equity Share Exchange Ratio of the equity shares of FEL and the respective Part A Companies. The final responsibility for the determination of the exchange ratio at which the Proposed Amalgamation shall take place will be with the Board of Directors of the respective Part A Companies who should take into account other factors such as their own assessment of the Proposed Amalgamation and input of other advisors.

The Equity Share Exchange Ratio has been arrived at on the basis of a relative equity valuation of FEL and the respective Part A Companies based on the various approaches/ methods explained herein earlier and various qualitative factors relevant to each company and the business dynamics and growth potentials of the businesses of these companies, having regard to information base, key underlying assumptions and limitations.

We have independently applied methods discussed above, as considered appropriate, and arrived at their assessment of the relative values per equity share of FEL and the respective Part A Companies. To arrive at the consensus on the Equity Share Exchange Ratio for the Proposed Amalgamation, suitable minor adjustments/ rounding off has been done in the relative values arrived at.

In light of the above, and on a consideration of all the relevant factors and circumstances as discussed and outlined herein above, we recommend the following Equity Share Exchange Ratio for the Proposed Amalgamation whose computation is as under:

The Computation of Equity Share Exchange Ratio as derived by BSR, is given below:

| Valuation Approach | Future Retail Limited | | Future Enterprises Limited | |
|-------------------------------------|-----------------------|-------------|----------------------------|-------------|
| | Value per Share (INR) | Weight | Value per Share (INR) | Weight |
| Income Approach | 155.88 | 50% | 12.79 | 50% |
| Market Approach (Market Price) | 95.06 | 25% | 11.56 | 25% |
| Market Approach (CCM) | 115.48 | 25% | 14.39 | 25% |
| Relative Value per Share | 130.57 | 100% | 12.88 | 100% |
| Exchange Ratio (rounded off) | 10.1 | | | |

Note:

(1) The scope carried out by BSR was based on the projections provided for Part A Companies only. Any other company, if included as a part of the Proposed Amalgamation is not in our scope of work and, based on instructions from the Client, have been considered at nil value. Accordingly any such companies, do not impact the Equity Share Exchange Ratio.

(2) The Equity Share Exchange Ratio has been arrived at, after considering Class B (Series 1) shares of FEL, as well as ESOPs of the respective companies, where the exercise price was below the market price.

Valuer's Notes:

For the present valuation analysis, we have considered it appropriate to apply the Income Approach and the Market Approach (Market Price and CCM), to arrive at the relative fair value of the equity shares of the companies for the purpose of the Proposed Amalgamation.

In the current analysis, the amalgamation of the companies is proceeded with on the assumption that the companies would merge as going concerns (subject to the implementation of the composite scheme of merger) and an actual realization of the operating assets is not contemplated. The operating assets have therefore been considered at their book and non-operating/ surplus assets, if any at their fair values under the Asset Approach. In such a going concern scenario, the relative earning power, as reflected under the Income and Market approaches, is of greater importance to the basis of amalgamation/ merger, with the values arrived at on the net asset basis being of limited relevance. Hence, the Asset Approach has not been considered in arriving at the Equity Share Exchange Ratio.

Given the nature of the businesses of the companies and the fact that we have been provided by the Part A Companies with their projected financials, we have considered it appropriate to apply the DCF Method under the Income Approach to arrive at the relative fair value of the shares of the Part A Companies for the purpose of arriving at the Equity Share Exchange Ratio.

In the present case, the equity shares of both the companies, FEL and FCL, are listed on BSE and NSE. Please note that for Market Price Method, we have considered market price movements till 10 June 2020 given that there has been significant movement in share price for Part A Companies on account of market speculations of this transaction post this date. We have also applied the CCM Method under the Market Approach to arrive at the relative fair value of the shares for the purpose of arriving at the Equity Share Exchange Ratio.

Similarly, in the absence of any comparable transactions similar to the companies being evaluated as a part of this Report, the Market Approach (CTM) has not been considered in arriving at the Equity Share Exchange Ratio.

Ratio:

In light of the above, and on a consideration of all the relevant factors and circumstances as discussed and outlined herein above, we recommend the following Equity Share Exchange Ratio for the Proposed Amalgamation:

101 (One hundred and one only) equity share of FEL of INR 2/- each fully paid up for every 10 (Ten only) equity shares of FRL of INR 2/- each fully paid up.

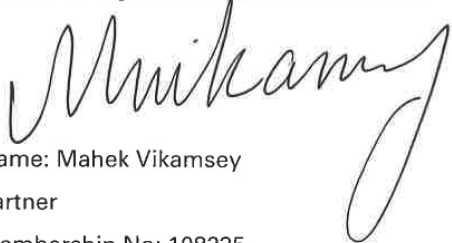

Our Valuation Report and Equity Share Exchange Ratio is based on the equity share capital structure of FEL and the respective Part A Companies as mentioned earlier in this Report. Any variation in the equity capital of FEL and the respective Part A Companies may have material impact on the Equity Share Exchange Ratio.

APPROACH – BASIS OF AMALGAMATION

The Scheme contemplates the Proposed Amalgamation under Sections 230 to 232 of the Companies Act, 2013 and other relevant provisions of the Companies Act, 2013 and rules issued thereunder to the extent applicable.

Arriving at the Equity Share Exchange Ratio for the purposes of an amalgamation such as the Proposed Amalgamation, would require determining the relative values of each company involved and of their shares. These values are to be determined independently but on a relative basis, and without considering the effect of the merger.

The three main valuation approaches are the market approach, income approach and asset approach. There are several commonly used and accepted methods within the market approach, income approach and asset approach, for determining the relative fair value of equity shares of a company, which can be considered in the present valuation exercise, to the extent relevant and applicable, to arrive at the Equity Share Exchange Ratio for the purpose of the Proposed Amalgamation, such as:

1. Asset Approach - Net Asset Value (NAV) Method
2. Income Approach - Discounted Cash Flow (DCF) Method
3. Market Approach
 - Market Price Method
 - Comparable Companies Multiples (CCM) Method
 - Comparable Transactions Multiples (CTM) Method

It should be understood that the valuation of any company or its assets is inherently subjective and is subject to uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the companies. In addition, this valuation will fluctuate with changes in prevailing market conditions, the conditions and prospects, financial and otherwise, of the companies/businesses, and other factors which generally influence the valuation of companies and their assets.

The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of method of valuation has been arrived at using usual and conventional methods adopted for transactions of a similar nature and our reasonable judgment, in an independent and bona fide manner based on our previous experience of assignments of a similar nature.

Asset Approach - Net Asset Value Method

Under the asset approach, the net asset value method is considered, which is based on the underlying net assets and liabilities of the company, taking into account operating assets and liabilities on a book value basis and appropriate adjustments for, inter alia, value of surplus/ non-operating assets.

Income Approach: Income approach is a valuation approach that converts maintainable or future amounts (e.g., cash flows or income and expenses) to a single current (i.e., discounted or capitalised) amount. The value measurement is determined on the basis of the value indicated by current market expectations about those future amounts.

- **Discounted Cash Flow (DCF) Method:** Under this method, either:
 - the projected free cash flows from business operations available to all providers of capital are discounted at the weighted average cost of capital to such capital providers, on a market participant basis, and the sum of such discounted free cash flows is the value of the business from which value of debt and other capital is deducted, and other relevant adjustments made to arrive at the value of the equity – Free Cash Flows to Firm (FCFF) technique; This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and creditors), weighted by their relative contribution to the total capital of the company. The opportunity cost to the capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk; or
 - the projected free cash flows from business operations available to equity shareholders (after deducting cash flows attributable to the debt and other capital providers) are discounted at the cost of equity, on a market participant basis, and the sum of such discounted free cash flows, after making other relevant adjustments, is the value of the equity - Free Cash Flows to Equity (FCFE) technique. This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to the equity capital providers. The opportunity cost to the equity capital provider equals the rate of return such equity capital provider expects to earn on other investments of equivalent risk.

Market Approach: Market approach is a valuation approach that uses prices and other relevant information generated by market transactions involving identical or comparable (i.e., similar) assets, liabilities or a group of assets and liabilities, such as a business.

- **Market Price Method:** Under this method, the value of shares of a company is determined by taking the average of the market capitalisation of the equity shares of such company as quoted on a recognised stock exchange over reasonable periods of time where such quotations are arising from the shares being regularly and freely traded in an active market, subject to the element of speculative support that may be inbuilt in the market price. But there could be situations where the value of the share as quoted on the stock market would not be regarded as a proper index of the fair value of the share, especially where the market values are fluctuating in a volatile capital market. Further, in the case of an amalgamation, where there is a question of evaluating the shares of one company against those of another, the volume of transactions and the number of shares available for trading on the stock exchange over a reasonable period would have to be of a comparable standard. This method would also cover any other transactions in the shares of the company including primary/ preferential issues/ open offer in the shares of the company available in the public domain.

- **Comparable Companies Multiples (CCM) Method:** Under this method, one attempts to measure the value of the shares/ business of company by applying the derived market multiple based on market quotations of comparable public/ listed companies, in an active market, possessing attributes similar to the business of such company - to the relevant financial parameter of the company/ business (based on past and/ or projected working results) after making adjustments to the derived multiples on account of dissimilarities with the comparable companies and the strengths, weaknesses and other factors peculiar to the company being valued. These valuations are based on the principle that such market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.
- **Comparable Transactions Multiples (CTM) Method:** Under this method, one attempts to measure the value of the shares/ business of company by applying the market multiples of publicly disclosed transactions in similar space as the respective companies being evaluated. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

Out of the above methods, we have used approaches/ methods as considered appropriate. The valuation approaches/ methods used, and the values arrived at using such approaches/ methods by us have been tabled in the next section of this Report.

BASIS OF EQUITY SHARE EXCHANGE RATIO

The basis of the Proposed Amalgamation would have to be determined after taking into consideration all the factors, approaches and methods considered appropriate by the Valuers. Though different values have been arrived at under each of the above approaches/ methods, for the purposes of recommending the Equity Share Exchange Ratio it is necessary to arrive at a single value for the shares of the companies involved in an amalgamation such as the Proposed Amalgamation. It is however important to note that in doing so, we are not attempting to arrive at the absolute values of the shares of the companies but at their relative values to facilitate the determination of an Equity Share Exchange Ratio. For this purpose, it is necessary to give appropriate weights to the values arrived at under each approach/ method.

In the ultimate analysis, valuation will have to be arrived at by the exercise of judicious discretion by the valuer and judgments taking into account all the relevant factors. There will always be several factors, e.g. quality of the management, present and prospective competition, yield on comparable securities and market sentiment, etc. which are not evident from the face of the balance sheet but which will strongly influence the worth of a share.

The determination of an exchange ratio is not a precise science and the conclusions arrived at in many cases will, of necessity, be subjective and dependent on the exercise of individual judgment. This concept is also recognized in judicial decisions. There is, therefore, no indisputable single exchange ratio. While we have provided our recommendation of the Equity Share Exchange Ratio based on the information available to us and within the scope and constraints of our engagement, others may have a different opinion as to the Equity Share Exchange Ratio of the equity shares of FEL and the respective Part A Companies. The final responsibility for the determination of the exchange ratio at which the Proposed Amalgamation shall take place will be with the Board of Directors of the respective Part A Companies who should take into account other factors such as their own assessment of the Proposed Amalgamation and input of other advisors.

The Equity Share Exchange Ratio has been arrived at on the basis of a relative equity valuation of FEL and the respective Part A Companies based on the various approaches/ methods explained herein earlier and various qualitative factors relevant to each company and the business dynamics and growth potentials of the businesses of these companies, having regard to information base, key underlying assumptions and limitations.

We have independently applied methods discussed above, as considered appropriate, and arrived at their assessment of the relative values per equity share of FEL and the respective Part A Companies. To arrive at the consensus on the Equity Share Exchange Ratio for the Proposed Amalgamation, suitable minor adjustments/ rounding off has been done in the relative values arrived at.

In light of the above, and on a consideration of all the relevant factors and circumstances as discussed and outlined herein above, we recommend the following Equity Share Exchange Ratio for the Proposed Amalgamation whose computation is as under:

| Relative Value per Share | 168.19 | 100% | 12.88 | 100% |
| Exchange Ratio (rounded off) | 13.1 | | | |

Note:

(1) The scope carried out by BSR was based on the projections provided for the Part A Companies only. Any other company, if included as a part of the Proposed Amalgamation is not in our scope of work and, based on instructions from the Client, have been considered at nil value. Accordingly any such companies, do not impact the Equity Share Exchange Ratio.

(2) The Equity Share Exchange Ratio has been arrived at, after considering Class B (Series 1) shares of FEL, as well as ESOPs of the respective companies, where the exercise price was below the market price.

Valuer's Notes:

For the present valuation analysis, we have considered it appropriate to apply the Income Approach and the Market Approach (Market Price and CCM), to arrive at the relative fair value of the equity shares of the companies for the purpose of the Proposed Amalgamation.

In the current analysis, the amalgamation of the companies is proceeded with on the assumption that the companies would merge as going concerns (subject to the implementation of the composite scheme of merger) and an actual realization of the operating assets is not contemplated. The operating assets have therefore been considered at their book and non-operating/ surplus assets, if any at their fair values under the Asset Approach. In such a going concern scenario, the relative earning power, as reflected under the Income and Market approaches, is of greater importance to the basis of amalgamation/ merger, with the values arrived at on the net asset basis being of limited relevance. Hence, the Asset Approach has not

been considered in arriving at the Equity Share Exchange Ratio.

Given the nature of the businesses of the companies and the fact that we have been provided by the Part A Companies with their projected financials, we have considered it appropriate to apply the DCF Method under the Income Approach to arrive at the relative fair value of the shares of the Part A Companies for the purpose of arriving at the Equity Share Exchange Ratio.

In the present case, the equity shares of both the companies, FEL and FCL, are listed on BSE and NSE. Please note that for Market Price Method, we have considered market price movements till 10 June 2020 given that there has been significant movement in share price for Part A Companies on account of market speculations of this transaction post this date. We have also applied the CCM Method under the Market Approach to arrive at the relative fair value of the shares for the purpose of arriving at the Equity Share Exchange Ratio.

Similarly, in the absence of any comparable transactions similar to the companies being evaluated as a part of this Report, the Market Approach (CTM) has not been considered in arriving at the Equity Share Exchange Ratio.

Ratio:

In light of the above, and on a consideration of all the relevant factors and circumstances as discussed and outlined herein above, we recommend the following Equity Share Exchange Ratio for the Proposed Amalgamation:

131 (One hundred and thirty one only) equity share of FEL of INR 2/- each fully paid up for every 10 (Ten only) equity shares of FSCL of INR 10/- each fully paid up.

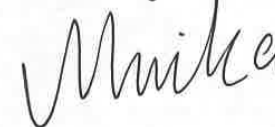

Our Valuation Report and Equity Share Exchange Ratio is based on the equity share capital structure of FEL and the respective Part A Companies as mentioned earlier in this Report. Any variation in the equity capital of FEL and the respective Part A Companies may have material impact on the Equity Share Exchange Ratio.

Respectfully submitted,

Our assumptions for the valuation is surrounded by these unprecedented uncertainty across all the industries and sectors including the time period over which these circumstances could prevail. The valuation assumptions, the underlying

projections and the outcome of the valuation analysis could materially change as a result of the continued or increased uncertainty around the prevalence of Covid-19 circumstances and hence a reliance on our valuation must be placed considering these unprecedented circumstances.

6. Procedures Adopted

6.1. In connection with this exercise, we have adopted the following procedures to carry out the valuation:

- Requested and received financial information;
- Obtained data available in public domain;
- Undertook industry analysis such as researching publicly available market data including economic factors and industry trends that may impact the valuation;
- Detailed analysis of Comparable Companies for each business;
- Discussions (over call/emails/conferences) with the management to understand the business and fundamental factors that could affect its earning-generating capability including strengths, weaknesses, opportunity and threats analysis and historical financial performance;
- Selection of valuation methodology/(ies) as per internationally accepted valuation methodologies;
- Determined the fair equity share swap ratio based on the selected methodology.

For the purpose of arriving at the valuation of the Companies/businesses we have considered the valuation base as 'Fair Value' and the premise of value is 'Going Concern Value'. Any change in the valuation base, or the premise could have significant impact on our valuation exercise, and therefore, this report.

7. Valuation Approaches

- 7.1. It is pertinent to note that the valuation of any company or its assets is inherently imprecise and is subject to certain uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made numerous assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the companies. In addition, this valuation will fluctuate with changes in prevailing market conditions, and prospects, financial and otherwise, of the companies/businesses, and other factors which generally influence the valuation of the companies, its businesses and assets.
- 7.2. The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for transactions of a similar nature and our reasonable judgment, analysis of businesses, in an independent and bona fide manner based on our previous experience of assignments of a similar nature.
- 7.3. It may be noted that BDO Valuation Advisory LLP is enrolled with IOV Registered Valuers Foundation, which has recommended to follow International Valuation Standards ("IVS") for undertaking valuation and accordingly we have considered the IVS issued by International Valuation Standards Council ('IVSC') in carrying out the valuation exercise.
- 7.4. The Report Date is valuation date ('Valuation Date'). For valuation exercise, market parameters have been considered up to and including August 21, 2020.
- 7.5. There are three generally accepted approaches to valuation:
- (a) "Cost" Approach
 - (b) "Income" Approach
 - (c) "Market" Approach

Within these three basic approaches, several methods may be used to estimate the value. An overview of these approaches is as follows:

Cost Approach

Summation Method

The summation method, also referred to as the underlying asset method, is typically used for investment companies or other types of assets or entities for which value is primarily a factor of the values of their holdings.

This valuation approach is mainly used in case where the assets base dominates earnings capability. A scheme of amalgamation would normally be proceeded with, on the assumption that the

companies amalgamate as going concerns and an actual realization of the operating assets is not contemplated. In a going concern scenario, the relative earning power, as reflected under the Income and Market approaches, is of greater importance to the basis of amalgamation, therefore, the values arrived at on the net asset basis being of limited relevance.

Income Approach

The income approach is widely used for valuation under "Going Concern" basis. It focuses on the income generated by the company in the past as well as its future earning capability. The Discounted Cash Flow Method under the income approach seeks to arrive at a valuation based on the strength of future cash flows.

Discounted Cash Flow Method

Under the Discounted Cash Flow ('DCF') method, the value of the undertaking is based on expected 'cash flows for future, discounted at a rate, which reflects the expected returns and the risks associated with the cash flows as against its accounting profits. The value of the undertaking is determined as the present value of its future free cash flows.

Free cash flows are discounted for the explicit forecast period and the perpetuity value thereafter. Free cash flows represent the cash available for distribution to both, the owners and creditors of the business.

Discount rate is the Weighted Average Cost of Capital ('WACC'), based on an optimal vis-à-vis actual capital structure. It is appropriate rate of discount to calculate the present value of future cash flows as it considers equity-debt risk and also debt-equity ratio of the firm.

The perpetuity (terminal) value is calculated based on the business's potential for further growth beyond the explicit forecast period. The "constant growth model" is applied, which implies an expected constant level of growth (for perpetuity) in the cash flows over the last year of the forecast period.

The discounting factor (rate of discounting the future cash flows) reflects not only the time value of money, but also the risk associated with the business's future operations.

The Business/Enterprise Value so derived, is further reduced by value of debt, if any, (net of cash and cash equivalents) to arrive at value to the owners of business. The surplus assets / non-operating assets are also adjusted.

In case of free cash flows to equity, the cash available for distribution to owners of the business is discounted at the Cost of Equity and the value so arrived is the Equity Value before surplus/ non-operating assets. The surplus assets / non-operating assets are further added to arrive at the Equity Value.

The future earning capability of the business is important, and the management of these companies have provided the future financial projections. Therefore, we have considered DCF Method under Income Approach.

Market Approach

Under the Market approach, the valuation is based on the market value of the company in case of listed companies and comparable companies trading or transaction multiples for unlisted companies. The Market approach generally reflects the investors' perception about the true worth of the company.

i. Market Price Method

Under this method, the market price of an equity share of the company as quoted on a recognized stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the trading. The market value reflects the investors' perception about the true worth of the company.

ii. Comparable Companies Multiple Method

Under the Comparable Companies Multiple ('CCM') method, the value is determined on the basis of multiples derived from valuations of comparable companies, as manifest through stock market valuations of listed companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

To the value of the business so arrived, adjustments need to be made for the value of contingent assets/liabilities, surplus Asset and dues payable to preference shareholders, if any, in order to arrive at the value for equity shareholders.

iii. Comparable Transactions Multiple Method

Under the Comparable Transactions Multiple ('CTM') method, the value of a company can be estimated by analyzing the prices paid by purchasers of similar companies under similar circumstances. This is a valuation method where one will be comparing recent market transactions in order to gauge current valuation of target company. Relevant multiples have to be chosen carefully and adjusted for differences between the circumstances. This valuation approach is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation.

Under Market Approach, we have considered CCM Method and MP Method. We have identified listed comparable companies based on business of each company and thereafter screen selected

multiple based on business composition, business description, etc. We have considered Sales multiple of the comparable listed companies. The total equity value is then divided by total number of equity shares for arriving at the value per equity share of companies under CCM Method.

- 7.6. The shares of all Companies are listed on BSE and NSE and there are regular transactions in their equity shares with reasonable volumes. We have considered the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulation 2018 as amended from time to time ('ICDR Regulations') for MP Method. Based on our analysis of public domain information about these Companies, we have observed that information related to proposed transaction with these Companies is available in public domain from 10th June 2020 and share price of these companies are affected due to influence of this information. Therefore, 10th June 2020 has been considered as relevant date as per ICDR Regulations.

>>>This space has been intentionally left blank>>>

8. Basis of Fair Equity Share Swap Ratio

- 8.1. The basis of the fair equity share swap ratio for the Proposed Amalgamation would have to be determined after taking into consideration all the factors and methods mentioned hereinabove and to arrive at a final value for the shares of each company. We have considered consistent methods and weights for all these Companies to facilitate the determination of the fair equity share swap ratio.
- 8.2. We have considered it appropriate to assign equal weights to the value arrived in all the three methods.
- 8.3. The shares has been considered on fully diluted basis by giving effect to the outstanding ESOPs which are in the money as well as convertible instruments.
- 8.4. To arrive at the consensus on the fair equity share swap ratio for the Proposed Amalgamation, suitable minor adjustment/rounding off have been done in the values arrived.

>>>This space has been intentionally left blank>>>

9. Conclusion

9.1. We have used the combination of valuation Method as discussed above and arrived at the recommended fair equity share swap ratio which is as follows:

a) In the event of amalgamation of FCL into FEL:

| Valuation Approach | Valuation Method | FCL | | FEL | |
|--------------------------|------------------|-----------------------|---------|-----------------------|---------|
| | | Value Per Share (INR) | Weights | Value Per Share (INR) | Weights |
| Income Approach | DCF Method | 12.9 | 33.3% | 17.5 | 33.3% |
| Market Approach | MP Method | 14.5 | 33.3% | 11.3 | 33.3% |
| Market Approach | CCM Method | 9.2 | 33.3% | 13.3 | 33.3% |
| Cost Approach | NAV Method | NA | NA | NA | NA |

- Requested and received financial information;
- Obtained data available in public domain;
- Undertook industry analysis such as researching publicly available market data including economic factors and industry trends that may impact the valuation;
- Detailed analysis of Comparable Companies for each business;
- Discussions (over call/emails/conferences) with the management to understand the business and fundamental factors that could affect its earning-generating capability including strengths, weaknesses, opportunity and threats analysis and historical financial performance;

7. Valuation Approaches

- 7.1. It is pertinent to note that the valuation of any company or its assets is inherently imprecise and is subject to certain uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made numerous assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the companies. In addition, this valuation will fluctuate with changes in prevailing market conditions, and prospects, financial and otherwise, of the companies/businesses, and other factors which generally influence the valuation of the companies, its businesses and assets.
- 7.2. The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for transactions of a similar nature and our reasonable judgment, analysis of businesses, in an independent and bona fide manner based on our previous experience of assignments of a similar nature.
- 7.3. It may be noted that BDO Valuation Advisory LLP is enrolled with IOV Registered Valuers Foundation, which has recommended to follow International Valuation Standards (“IVS”) for undertaking valuation and accordingly we have considered the International Valuation Standards issued by International Valuation Standards Council (‘IVSC’) in carrying out the valuation exercise.
- 7.4. The Report Date is valuation date (‘Valuation Date’). For valuation exercise, market parameters have been considered up to and including August 21, 2020.
- 7.5. There are three generally accepted approaches to valuation:
- (a) "Cost" Approach
 - (b) "Income" Approach
 - (c) "Market" Approach

Within these three basic approaches, several methods may be used to estimate the value. An overview of these approaches is as follows:

Cost Approach

Summation Method

The summation method, also referred to as the underlying asset method, is typically used for investment companies or other types of assets or entities for which value is primarily a factor of the values of their holdings.

This valuation approach is mainly used in case where the assets base dominates earnings capability. A scheme of amalgamation would normally be proceeded with, on the assumption that the

companies amalgamate as going concerns and an actual realization of the operating assets is not contemplated. In a going concern scenario, the relative earning power, as reflected under the Income and Market approaches, is of greater importance to the basis of amalgamation, therefore, the values arrived at on the net asset basis being of limited relevance.

Income Approach

The income approach is widely used for valuation under "Going Concern" basis. It focuses on the income generated by the company in the past as well as its future earning capability. The Discounted Cash Flow Method under the income approach seeks to arrive at a valuation based on the strength of future cash flows.

Discounted Cash Flow Method

Under the Discounted Cash Flow ('DCF') method, the value of the undertaking is based on expected 'cash flows for future, discounted at a rate, which reflects the expected returns and the risks associated with the cash flows as against its accounting profits. The value of the undertaking is determined as the present value of its future free cash flows.

Free cash flows are discounted for the explicit forecast period and the perpetuity value thereafter. Free cash flows represent the cash available for distribution to both, the owners and creditors of the business.

Discount rate is the Weighted Average Cost of Capital ('WACC'), based on an optimal vis-à-vis actual capital structure. It is appropriate rate of discount to calculate the present value of future cash flows as it considers equity-debt risk and also debt-equity ratio of the firm.

The perpetuity (terminal) value is calculated based on the business's potential for further growth beyond the explicit forecast period. The "constant growth model" is applied, which implies an expected constant level of growth (for perpetuity) in the cash flows over the last year of the forecast period.

The discounting factor (rate of discounting the future cash flows) reflects not only the time value of money, but also the risk associated with the business's future operations.

The Business/Enterprise Value so derived, is further reduced by value of debt, if any, (net of cash and cash equivalents) to arrive at value to the owners of business. The surplus assets / non-operating assets are also adjusted.

In case of free cash flows to equity, the cash available for distribution to owners of the business is discounted at the Cost of Equity and the value so arrived is the Equity Value before surplus/ non-operating assets. The surplus assets / non-operating assets are further added to arrive at the Equity Value.

The future earning capability of the business is important, and the management of these companies have provided the future financial projections. Therefore, we have considered DCF Method under Income Approach.

Market Approach

Under the Market approach, the valuation is based on the market value of the company in case of listed companies and comparable companies trading or transaction multiples for unlisted companies. The Market approach generally reflects the investors' perception about the true worth of the company.

i. Market Price Method

Under this method, the market price of an equity share of the company as quoted on a recognized stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the trading. The market value reflects the investors' perception about the true worth of the company.

ii. Comparable Companies Multiple Method

Under the Comparable Companies Multiple ('CCM') method, the value is determined on the basis of multiples derived from valuations of comparable companies, as manifest through stock market valuations of listed companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

To the value of the business so arrived, adjustments need to be made for the value of contingent assets/liabilities, surplus Asset and dues payable to preference shareholders, if any, in order to arrive at the value for equity shareholders.

iii. Comparable Transactions Multiple Method

Under the Comparable Transactions Multiple ('CTM') method, the value of a company can be estimated by analyzing the prices paid by purchasers of similar companies under similar circumstances. This is a valuation method where one will be comparing recent market transactions in order to gauge current valuation of target company. Relevant multiples have to be chosen carefully and adjusted for differences between the circumstances. This valuation approach is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation.

Under Market Approach, we have considered CCM Method and MP Method. We have identified listed comparable companies based on business of each company and thereafter screen selected

multiple based on business composition, business description, etc. We have considered Sales multiple of the comparable listed companies. The total equity value is then divided by total number of equity shares for arriving at the value per equity share of companies under CCM Method.

- 7.6. The shares of all Companies are listed on BSE and NSE and there are regular transactions in their equity shares with reasonable volumes. We have considered to the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulation 2018 as amended from time to time ('ICDR Regulations') for MP Method. Based on our analysis of public domain information about these Companies, we have observed that information related to proposed transaction with these Companies is available in public domain from 10th June 2020 and share price of these companies are affected due to influence of this information. Therefore, 10th June 2020 has been considered as relevant date as per ICDR Regulations.

>>>This space has been intentionally left blank>>>

8. Basis of Fair Equity Share Swap Ratio

- 8.1. The basis of the fair equity share swap ratio for the Proposed Amalgamation would have to be determined after taking into consideration all the factors and methods mentioned hereinabove and to arrive at a final value for the shares of each company. We have considered consistent methods and weights for all these Companies to facilitate the determination of the fair equity share swap ratio.
- 8.2. We have considered it appropriate to assign equal weights to the value arrived in all the three methods.
- 8.3. The shares have been considered on fully diluted basis by giving effect to the outstanding ESOPs which are in the money.
- 8.4. To arrive at the consensus on the fair equity share swap ratio for the Proposed Amalgamation, suitable minor adjustment/rounding off have been done in the values arrived.

>>>This space has been intentionally left blank>>>

9. Conclusion

9.1. We have used the combination of valuation Method as discussed above and arrived at the recommended fair equity share swap ratio which is as follows:

a) In the event of amalgamation of FLFL into FEL:

| Valuation Approach | Valuation Method | FLFL | | FEL | |
|--------------------------|------------------|-----------------------|---------|-----------------------|---------|
| | | Value Per Share (INR) | Weights | Value Per Share (INR) | Weights |
| Income Approach | DCF Method | 165.4 | 33.3% | 17.5 | 33.3% |
| Market Approach | MP Method | 147.0 | 33.3% | 11.3 | 33.3% |
| Market Approach | CCM Method | 174.0 | 33.3% | 13.3 | 33.3% |
| Cost Approach | NAV Method | NA | NA | NA | NA |
| Value Per Share | | 162.1 | | 14.0 | |
| Swap Ratio (Rounded Off) | | 11.6 | | NA | |

NA= Not Adopted/Not Applicable

9.2. Therefore, the following is the recommended Fair Equity Share Swap Ratio:

- 116 equity shares of FEL (of INR 2/- each, fully paid up) for every 10 equity shares held in FLFL (of INR 2/- each fully paid up) for the proposed amalgamation.

6. Procedures Adopted

6.1. In connection with this exercise, we have adopted the following procedures to carry out the valuation:

- Requested and received financial information;
- Obtained data available in public domain;
- Undertook industry analysis such as researching publicly available market data including economic factors and industry trends that may impact the valuation;
- Detailed analysis of Comparable Companies for each business;
- Discussions (over call/emails/conferences) with the management to understand the business and fundamental factors that could affect its earning-generating capability including strengths, weaknesses, opportunity and threats analysis and historical financial performance;
- Selection of valuation methodology/(ies) as per internationally accepted valuation methodologies;
- Determined the fair equity share swap ratio based on the selected methodology.

For the purpose of arriving at the valuation of the Companies/businesses we have considered the valuation base as 'Fair Value' and the premise of value is 'Going Concern Value'. 7. Valuation Approaches

- 7.1. It is pertinent to note that the valuation of any company or its assets is inherently imprecise and is subject to certain uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made numerous assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the companies. In addition, this valuation will fluctuate with changes in prevailing market conditions, and prospects, financial and otherwise, of the companies/businesses, and other factors which generally influence the valuation of the companies, its businesses and assets.
- 7.2. The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for transactions of a similar nature and our reasonable judgment, analysis of businesses, in an independent and bona fide manner based on our previous experience of assignments of a similar nature.
- 7.3. It may be noted that BDO Valuation Advisory LLP is enrolled with IOV Registered Valuers Foundation, which has recommended to follow International Valuation Standards (“IVS”) for undertaking valuation and accordingly we have considered the International Valuation Standards issued by International Valuation Standards Council (‘IVSC’) in carrying out the valuation exercise.
- 7.4. The Report Date is the valuation date (‘Valuation Date’). For valuation exercise, market parameters have been considered up to and including August 21, 2020.
- 7.5. There are three generally accepted approaches to valuation:
 - (a) "Cost" Approach
 - (b) "Income" Approach
 - (c) "Market" Approach

Within these three basic approaches, several methods may be used to estimate the value. An overview of these approaches is as follows:

Cost Approach

Summation Method

The summation method, also referred to as the underlying asset method, is typically used for investment companies or other types of assets or entities for which value is primarily a factor of the values of their holdings.

This valuation approach is mainly used in case where the assets base dominates earnings capability. A scheme of amalgamation would normally be proceeded with, on the assumption that the

companies amalgamate as going concerns and an actual realization of the operating assets is not contemplated. In a going concern scenario, the relative earning power, as reflected under the Income and Market approaches, is of greater importance to the basis of amalgamation, therefore, the values arrived at on the net asset basis being of limited relevance.

Income Approach

The income approach is widely used for valuation under "Going Concern" basis. It focuses on the income generated by the company in the past as well as its future earning capability. The Discounted Cash Flow Method under the income approach seeks to arrive at a valuation based on the strength of future cash flows.

Discounted Cash Flow Method

Under the Discounted Cash Flow ('DCF') method, the value of the undertaking is based on expected 'cash flows for future, discounted at a rate, which reflects the expected returns and the risks associated with the cash flows as against its accounting profits. The value of the undertaking is determined as the present value of its future free cash flows.

Free cash flows are discounted for the explicit forecast period and the perpetuity value thereafter. Free cash flows represent the cash available for distribution to both, the owners and creditors of the business.

Discount rate is the Weighted Average Cost of Capital ('WACC'), based on an optimal vis-à-vis actual capital structure. It is appropriate rate of discount to calculate the present value of future cash flows as it considers equity-debt risk and also debt-equity ratio of the firm.

The perpetuity (terminal) value is calculated based on the business's potential for further growth beyond the explicit forecast period. The "constant growth model" is applied, which implies an expected constant level of growth (for perpetuity) in the cash flows over the last year of the forecast period.

The discounting factor (rate of discounting the future cash flows) reflects not only the time value of money, but also the risk associated with the business's future operations.

The Business/Enterprise Value so derived, is further reduced by value of debt, if any, (net of cash and cash equivalents) to arrive at value to the owners of business. The surplus assets / non-operating assets are also adjusted.

In case of free cash flows to equity, the cash available for distribution to owners of the business is discounted at the Cost of Equity and the value so arrived is the Equity Value before surplus/ non-operating assets. The surplus assets / non-operating assets are further added to arrive at the Equity Value.

The future earning capability of the business is important, and the management of these companies have provided the future financial projections. Therefore, we have considered DCF Method under Income Approach.

Market Approach

Under the Market approach, the valuation is based on the market value of the company in case of listed companies and comparable companies trading or transaction multiples for unlisted companies. The Market approach generally reflects the investors' perception about the true worth of the company.

i. Market Price Method

Under this method, the market price of an equity share of the company as quoted on a recognized stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the trading. The market value reflects the investors' perception about the true worth of the company.

ii. Comparable Companies Multiple Method

Under the Comparable Companies Multiple ('CCM') method, the value is determined on the basis of multiples derived from valuations of comparable companies, as manifest through stock market valuations of listed companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

To the value of the business so arrived, adjustments need to be made for the value of contingent assets/liabilities, surplus Asset and dues payable to preference shareholders, if any, in order to arrive at the value for equity shareholders.

iii. Comparable Transactions Multiple Method

Under the Comparable Transactions Multiple ('CTM') method, the value of a company can be estimated by analyzing the prices paid by purchasers of similar companies under similar circumstances. This is a valuation method where one will be comparing recent market transactions in order to gauge current valuation of target company. Relevant multiples have to be chosen carefully and adjusted for differences between the circumstances. This valuation approach is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation.

Under Market Approach, we have considered CCM Method and MP Method. We have identified listed comparable companies based on business of each company and thereafter screen selected

multiple based on business composition, business description, etc. We have considered Sales multiple of the comparable listed companies. The total equity value is then divided by total number of equity shares for arriving at the value per equity share of companies under CCM Method.

- 7.6. **The shares of all Companies are listed on BSE and NSE and there are regular transactions in their equity shares with reasonable volumes.** We have considered the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulation 2018 as amended from time to time ('ICDR Regulations') for MP Method. Based on our analysis of public domain information about these Companies, we have observed that information related to proposed transaction with these Companies is available in public domain from 10th June 2020 and share price of these companies are affected due to influence of this information. Therefore, 10th June 2020 has been considered as relevant date as per ICDR Regulations.

8. Basis of Fair Equity Share Swap Ratio

- 8.1. The basis of the fair equity share swap ratio for the Proposed Amalgamation would have to be determined after taking into consideration all the factors and methods mentioned hereinabove and to arrive at a final value for the shares of each company. We have considered consistent methods and weights for all these Companies to facilitate the determination of the fair equity share swap ratio.
- 8.2. We have considered it appropriate to assign equal weights to the value arrived in all the three methods.
- 8.3. The shares have been considered on fully diluted basis by giving effect to the outstanding ESOPs which are in the money.
- 8.4. To arrive at the consensus on the fair equity share swap ratio for the Proposed Amalgamation, suitable minor adjustment/rounding off have been done in the values arrived.

>>>This space has been intentionally left blank>>>

9. Conclusion

9.1. We have used the combination of valuation Method as discussed above and arrived at the recommended fair equity share swap ratio which is as follows:

a) In the event of amalgamation of FMNL into FEL:

| Valuation Approach | Valuation Method | FMNL | | FEL | |
|--------------------------|------------------|-----------------------|---------|-----------------------|---------|
| | | Value Per Share (INR) | Weights | Value Per Share (INR) | Weights |
| Income Approach | DCF Method | 28.6 | 33.3% | 17.5 | 33.3% |
| Market Approach | MP Method | 17.8 | 33.3% | 11.3 | 33.3% |
| Market Approach | CCM Method | 28.0 | 33.3% | 13.3 | 33.3% |
| Cost Approach | NAV Method | NA | NA | NA | NA |
| Value Per Share | | 24.8 | | 14.0 | |
| Swap Ratio (Rounded Off) | | 1.8 | | NA | |

NA= Not Adopted/Not Applicable

9.2. Therefore, the following is the recommended Fair Equity Share Swap Ratio:

- 18 equity shares of FEL (of INR 2/- each, fully paid up) for every 10 equity shares held in FMNL (of INR 10/- each fully paid up) for the proposed amalgamation.

Annexure 4: Valuation of FMNL & FEL as per Comparable Companies Method:

Under Market Approach, we have also considered CCM Method. We have identified listed comparable companies based on business of each company and thereafter screen selected multiple based on business composition, business description, etc. We have considered Sales multiple of the comparable listed companies (Annexure 5). The total equity value so derived is then divided by total number of equity shares for arriving at the value per equity share of companies under CCM Method.

7. Valuation Approaches

- 7.1. It is pertinent to note that the valuation of any company or its assets is inherently imprecise and is subject to certain uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made numerous assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the companies. In addition, this valuation will fluctuate with changes in prevailing market conditions, and prospects, financial and otherwise, of the companies/businesses, and other factors which generally influence the valuation of the companies, its businesses and assets.
- 7.2. The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for transactions of a similar nature and our reasonable judgment, analysis of businesses, in an independent and bona fide manner based on our previous experience of assignments of a similar nature.
- 7.3. It may be noted that BDO Valuation Advisory LLP is enrolled with IOV Registered Valuers Foundation, which has recommended to follow International Valuation Standards (“IVS”) for undertaking valuation and accordingly We have considered the International Valuation Standards issued by International Valuation Standards Council (‘IVS’) in carrying out the valuation exercise.
- 7.4. The Report Date is valuation date (‘Valuation Date’). For valuation exercise, market parameters have been considered up to and including August 21, 2020.
- 7.5. There are three generally accepted approaches to valuation:
 - (a) "Cost" Approach
 - (b) "Income" Approach
 - (c) "Market" Approach

Within these three basic approaches, several methods may be used to estimate the value. An overview of these approaches is as follows:

Cost Approach

Summation Method

The summation method, also referred to as the underlying asset method, is typically used for investment companies or other types of assets or entities for which value is primarily a factor of the values of their holdings.

This valuation approach is mainly used in case where the assets base dominates earnings capability. A scheme of amalgamation would normally be proceeded with, on the assumption that the

companies amalgamate as going concerns and an actual realization of the operating assets is not contemplated. In a going concern scenario, the relative earning power, as reflected under the Income and Market approaches, is of greater importance to the basis of amalgamation, therefore, the values arrived at on the net asset basis being of limited relevance.

Income Approach

The income approach is widely used for valuation under "Going Concern" basis. It focuses on the income generated by the company in the past as well as its future earning capability. The Discounted Cash Flow Method under the income approach seeks to arrive at a valuation based on the strength of future cash flows.

Discounted Cash Flow Method

Under the Discounted Cash Flow ('DCF') method, the value of the undertaking is based on expected 'cash flows for future, discounted at a rate, which reflects the expected returns and the risks associated with the cash flows as against its accounting profits. The value of the undertaking is determined as the present value of its future free cash flows.

Free cash flows are discounted for the explicit forecast period and the perpetuity value thereafter. Free cash flows represent the cash available for distribution to both, the owners and creditors of the business.

Discount rate is the Weighted Average Cost of Capital ('WACC'), based on an optimal vis-à-vis actual capital structure. It is appropriate rate of discount to calculate the present value of future cash flows as it considers equity-debt risk and also debt-equity ratio of the firm.

The perpetuity (terminal) value is calculated based on the business's potential for further growth beyond the explicit forecast period. The "constant growth model" is applied, which implies an expected constant level of growth (for perpetuity) in the cash flows over the last year of the forecast period.

The discounting factor (rate of discounting the future cash flows) reflects not only the time value of money, but also the risk associated with the business's future operations.

The Business/Enterprise Value so derived, is further reduced by value of debt, if any, (net of cash and cash equivalents) to arrive at value to the owners of business. The surplus assets / non-operating assets are also adjusted.

In case of free cash flows to equity, the cash available for distribution to owners of the business is discounted at the Cost of Equity and the value so arrived is the Equity Value before surplus/ non-operating assets. The surplus assets / non-operating assets are further added to arrive at the Equity Value.

The future earning capability of the business is important, and the management of these companies have provided the future financial projections. Therefore, we have considered DCF Method under Income Approach.

Market Approach

Under the Market approach, the valuation is based on the market value of the company in case of listed companies and comparable companies trading or transaction multiples for unlisted companies. The Market approach generally reflects the investors' perception about the true worth of the company.

i. Market Price Method

Under this method, the market price of an equity share of the company as quoted on a recognized stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the trading. The market value reflects the investors' perception about the true worth of the company.

ii. Comparable Companies Multiple Method

Under the Comparable Companies Multiple ('CCM') method, the value is determined on the basis of multiples derived from valuations of comparable companies, as manifest through stock market valuations of listed companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

To the value of the business so arrived, adjustments need to be made for the value of contingent assets/liabilities, surplus Asset and dues payable to preference shareholders, if any, in order to arrive at the value for equity shareholders.

iii. Comparable Transactions Multiple Method

Under the Comparable Transactions Multiple ('CTM') method, the value of a company can be estimated by analyzing the prices paid by purchasers of similar companies under similar circumstances. This is a valuation method where one will be comparing recent market transactions in order to gauge current valuation of target company. Relevant multiples have to be chosen carefully and adjusted for differences between the circumstances. This valuation approach is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation.

Under Market Approach, we have considered CCM Method and MP Method. We have identified listed comparable companies based on business of each company and thereafter screen selected

multiple based on business composition, business description, etc. We have considered Sales multiple of the comparable listed companies. The total equity value so derived is then divided by total number of equity shares for arriving at the value per equity share of companies under CCM Method.

- 7.6. The shares of all Companies are listed on BSE and NSE and there are regular transactions in their equity shares with reasonable volumes. We have considered to the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulation 2018 as amended from time to time ('ICDR Regulations') for MP Method. Based on our analysis of public domain information about these Companies, we have observed that information related to proposed transaction with these Companies is available in public domain from 10th June 2020 and share price of these companies are affected due to influence of this information. Therefore, 10th June 2020 has been considered as relevant date as per ICDR Regulations.

>>>This space has been intentionally left blank>>>

8. Basis of Fair Equity Share Swap Ratio

- 8.1. The basis of the fair equity share swap ratio for the Proposed Amalgamation would have to be determined after taking into consideration all the factors and methods mentioned hereinabove and to arrive at a final value for the shares of each company. We have considered consistent methods and weights for all these Companies to facilitate the determination of the fair equity share swap ratio.
- 8.2. We have considered it appropriate to assign equal weights to the value arrived in all the three methods.
- 8.3. The shares have been considered on fully diluted basis by giving effect to the outstanding ESOPs which are in the money.
- 8.4. To arrive at the consensus on the fair equity share swap ratio for the Proposed Amalgamation, suitable minor adjustment/rounding off have been done in the values arrived.

>>>This space has been intentionally left blank>>>

9. Conclusion

9.1. We have used the combination of valuation Method as discussed above and arrived at the recommended fair equity share swap ratio which is as follows:

a) In the event of amalgamation of FRL into FEL:

| Valuation Approach | Valuation Method | FRL | | FEL | |
|--------------------------|------------------|-----------------------|---------|-----------------------|---------|
| | | Value Per Share (INR) | Weights | Value Per Share (INR) | Weights |
| Income Approach | DCF Method | 141.3 | 33.3% | 17.5 | 33.3% |
| Market Approach | MP Method | 95.7 | 33.3% | 11.3 | 33.3% |
| Market Approach | CCM Method | 189.5 | 33.3% | 13.3 | 33.3% |
| Cost Approach | NAV Method | NA | NA | NA | NA |
| Value Per Share | | 142.2 | | 14.0 | |
| Swap Ratio (Rounded Off) | | 10.1 | | NA | |

NA= Not Adopted/Not Applicable

9.2. Therefore, the following is the recommended Fair Equity Share Swap Ratio:

- 101 equity shares of FEL (of INR 2/- each, fully paid up) for every 10 equity shares held in FRL (of INR 2/- each fully paid up) for the proposed amalgamation.

- Selection of valuation methodology/(ies) as per internationally accepted valuation methodologies;
- Determined the fair equity share swap ratio based on the selected methodology.

For the purpose of arriving at the valuation of the Companies/businesses we have considered the valuation base as 'Fair Value' and the premise of value is 'Going Concern Value'. Any change in the valuation base, or the premise could have significant impact on our valuation exercise, and therefore, this report.

The Companies have been provided with the opportunity to review the draft Report (excluding the recommended equity share swap ratio) as part of our standard practice to make sure that factual inaccuracies/omissions are avoided in our final Report.

7. Valuation Approaches

- 7.1. It is pertinent to note that the valuation of any company or its assets is inherently imprecise and is subject to certain uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made numerous assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the companies. In addition, this valuation will fluctuate with changes in prevailing market conditions, and prospects, financial and otherwise, of the companies/businesses, and other factors which generally influence the valuation of the companies, its businesses and assets.
- 7.2. The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for transactions of a similar nature and our reasonable judgment, analysis of businesses, in an independent and bona fide manner based on our previous experience of assignments of a similar nature.
- 7.3. It may be noted that BDO Valuation Advisory LLP is enrolled with IOV Registered Valuers Foundation, which has recommended to follow International Valuation Standards ("IVS") for undertaking valuation and accordingly we have considered the International Valuation Standards issued by International Valuation Standards Council ('IVSC') in carrying out the valuation exercise.
- 7.4. The Report Date is valuation date ('Valuation Date'). For valuation exercise, market parameters have been considered up to and including August 21, 2020.
- 7.5. There are three generally accepted approaches to valuation:
 - (a) "Cost" Approach
 - (b) "Income" Approach
 - (c) "Market" Approach

Within these three basic approaches, several methods may be used to estimate the value. An overview of these approaches is as follows:

Cost Approach

Summation Method

The summation method, also referred to as the underlying asset method, is typically used for investment companies or other types of assets or entities for which value is primarily a factor of the values of their holdings.

This valuation approach is mainly used in case where the assets base dominates earnings capability. A scheme of amalgamation would normally be proceeded with, on the assumption that the

companies amalgamate as going concerns and an actual realization of the operating assets is not contemplated. In a going concern scenario, the relative earning power, as reflected under the Income and Market approaches, is of greater importance to the basis of amalgamation, therefore, the values arrived at on the net asset basis being of limited relevance.

Income Approach

The income approach is widely used for valuation under "Going Concern" basis. It focuses on the income generated by the company in the past as well as its future earning capability. The Discounted Cash Flow Method under the income approach seeks to arrive at a valuation based on the strength of future cash flows.

Discounted Cash Flow Method

Under the Discounted Cash Flow ('DCF') method, the value of the undertaking is based on expected 'cash flows for future, discounted at a rate, which reflects the expected returns and the risks associated with the cash flows as against its accounting profits. The value of the undertaking is determined as the present value of its future free cash flows.

Free cash flows are discounted for the explicit forecast period and the perpetuity value thereafter. Free cash flows represent the cash available for distribution to both, the owners and creditors of the business.

Discount rate is the Weighted Average Cost of Capital ('WACC'), based on an optimal vis-à-vis actual capital structure. It is appropriate rate of discount to calculate the present value of future cash flows as it considers equity-debt risk and also debt-equity ratio of the firm.

The perpetuity (terminal) value is calculated based on the business's potential for further growth beyond the explicit forecast period. The "constant growth model" is applied, which implies an expected constant level of growth (for perpetuity) in the cash flows over the last year of the forecast period.

The discounting factor (rate of discounting the future cash flows) reflects not only the time value of money, but also the risk associated with the business's future operations.

The Business/Enterprise Value so derived, is further reduced by value of debt, if any, (net of cash and cash equivalents) to arrive at value to the owners of business. The surplus assets / non-operating assets are also adjusted.

In case of free cash flows to equity, the cash available for distribution to owners of the business is discounted at the Cost of Equity and the value so arrived is the Equity Value before surplus/ non-operating assets. The surplus assets / non-operating assets are further added to arrive at the Equity Value.

The future earning capability of the business is important, and the management of these companies have provided the future financial projections. Therefore, we have considered DCF Method under Income Approach.

Market Approach

Under the Market approach, the valuation is based on the market value of the company in case of listed companies and comparable companies trading or transaction multiples for unlisted companies. The Market approach generally reflects the investors' perception about the true worth of the company.

i. Market Price Method

Under this method, the market price of an equity share of the company as quoted on a recognized stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the trading. The market value reflects the investors' perception about the true worth of the company.

ii. Comparable Companies Multiple Method

Under the Comparable Companies Multiple ('CCM') method, the value is determined on the basis of multiples derived from valuations of comparable companies, as manifest through stock market valuations of listed companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

To the value of the business so arrived, adjustments need to be made for the value of contingent assets/liabilities, surplus Asset and dues payable to preference shareholders, if any, in order to arrive at the value for equity shareholders.

iii. Comparable Transactions Multiple Method

Under the Comparable Transactions Multiple ('CTM') method, the value of a company can be estimated by analyzing the prices paid by purchasers of similar companies under similar circumstances. This is a valuation method where one will be comparing recent market transactions in order to gauge current valuation of target company. Relevant multiples have to be chosen carefully and adjusted for differences between the circumstances. This valuation approach is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation.

Under Market Approach, we have considered CCM Method and MP Method. We have identified listed comparable companies based on business of each company and thereafter screen selected

multiple based on business composition, business description, etc. We have considered Sales multiple of the comparable listed companies. The total equity value so derived is then divided by total number of equity shares for arriving at the value per equity share of companies under CCM Method.

- 7.6. **The shares of all Companies are listed on BSE and NSE and there are regular transactions in their equity shares with reasonable volumes.** We have considered the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulation 2018 as amended from time to time (**'ICDR Regulations'**) for MP Method. Based on our analysis of public domain information about these Companies, we have observed that information related to proposed transaction with these Companies is available in public domain from 10th June 2020 and share price of these companies are affected due to influence of this information. Therefore, 10th June 2020 has been considered as relevant date as per ICDR Regulations.

>>>This space has been intentionally left blank>>>

8. Basis of Fair Equity Share Swap Ratio

- 8.1. The basis of the fair equity share swap ratio for the Proposed Amalgamation would have to be determined after taking into consideration all the factors and methods mentioned hereinabove and to arrive at a final value for the shares of each company. We have considered consistent methods and weights for all these Companies to facilitate the determination of the fair equity share swap ratio.
- 8.2. We have considered it appropriate to assign equal weights to the value arrived in all the three methods.
- 8.3. The shares have been considered on fully diluted basis by giving effect to the outstanding ESOPs which are in the money.
- 8.4. To arrive at the consensus on the fair equity share swap ratio for the Proposed Amalgamation, suitable minor adjustment/rounding off have been done in the values arrived.

>>>This space has been intentionally left blank>>>

9. Conclusion

9.1. We have used the combination of valuation Method as discussed above and arrived at the recommended fair equity share swap ratio which is as follows:

a) In the event of amalgamation of FSCSL into FEL:

| Valuation Approach | Valuation Method | FSCSL | | FEL | |
|---------------------------------|------------------|-----------------------|---------|-----------------------|---------|
| | | Value Per Share (INR) | Weights | Value Per Share (INR) | Weights |
| Income Approach | DCF Method | 221.0 | 33.3% | 17.5 | 33.3% |
| Market Approach | MP Method | 135.7 | 33.3% | 11.3 | 33.3% |
| Market Approach | CCM Method | 193.3 | 33.3% | 13.3 | 33.3% |
| Cost Approach | NAV Method | NA | NA | NA | NA |
| Value Per Share | | 183.3 | | 14.0 | |
| Swap Ratio (Rounded Off) | | 13.1 | | NA | |

NA= Not Adopted/Not Applicable

9.2. Therefore, the following is the recommended Fair Equity Share Swap Ratio:

- 131 equity shares of FEL (of INR 2/- each, fully paid up) for every 10 equity shares held in FSCSL (of INR 10/- each fully paid up) for the proposed amalgamation.

6. Procedures Adopted

6.1. In connection with this exercise, we have adopted the following procedures to carry out the valuation:

- Requested and received financial information;
- Obtained data available in public domain;
- Undertook industry analysis such as researching publicly available market data including economic factors and industry trends that may impact the valuation;
- Detailed analysis of Comparable Companies for each business;
- Discussions (over call/emails/conferences) with the management to understand the business and fundamental factors that could affect its earning-generating capability including strengths, weaknesses, opportunity and threats analysis and historical financial performance;
- Selection of valuation methodology/(ies) as per internationally accepted valuation methodologies;
- Determined the fair equity share swap ratio based on the selected methodology.

For the purpose of arriving at the valuation of the Companies/businesses we have considered the valuation base as 'Fair Value' and the premise of value is 'Going Concern Value'. Any change in the valuation base, or the premise could have significant impact on our valuation exercise, and therefore, this report.

The Companies have been provided with the opportunity to review the draft Report (excluding the recommended equity share swap ratio) as part of our standard practice to make sure that factual inaccuracies/omissions are avoided in our final Report.

7. Valuation Approaches

- 7.1. It is pertinent to note that the valuation of any company or its assets is inherently imprecise and is subject to certain uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made numerous assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the companies. In addition, this valuation will fluctuate with changes in prevailing market conditions, and prospects, financial and otherwise, of the companies/businesses, and other factors which generally influence the valuation of the companies, its businesses and assets.
- 7.2. The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for transactions of a similar nature and our reasonable judgment, analysis of businesses, in an independent and bona fide manner based on our previous experience of assignments of a similar nature.
- 7.3. It may be noted that BDO Valuation Advisory LLP is enrolled with IOV Registered Valuers Foundation, which has recommended to follow International Valuation Standards (“IVS”) for undertaking valuation and accordingly we have considered the International Valuation Standards issued by International Valuation Standards Council (‘IVSC’) in carrying out the valuation exercise.
- 7.4. The Report Date is the valuation date (**‘Valuation Date’**). For valuation exercise, market parameters have been considered up to and including August 21, 2020.
- 7.5. There are three generally accepted approaches to valuation:
- (a) "Cost" Approach
 - (b) "Income" Approach
 - (c) "Market" Approach

Within these three basic approaches, several methods may be used to estimate the value. An overview of these approaches is as follows:

Cost Approach

Summation Method

The summation method, also referred to as the underlying asset method, is typically used for investment companies or other types of assets or entities for which value is primarily a factor of the values of their holdings.

This valuation approach is mainly used in case where the assets base dominates earnings capability. A scheme of amalgamation would normally be proceeded with, on the assumption that the companies amalgamate as going concerns and an actual realization of the operating assets is not contemplated. In a going concern scenario, the relative earning power, as reflected under the Income and Market approaches, is of greater importance to the basis of amalgamation, therefore, the values arrived at on the net asset basis being of limited relevance.

Income Approach

The income approach is widely used for valuation under "Going Concern" basis. It focuses on the income generated by the company in the past as well as its future earning capability. The Discounted Cash Flow Method under the income approach seeks to arrive at a valuation based on the strength of future cash flows.

Discounted Cash Flow Method

Under the Discounted Cash Flow ('DCF') method, the value of the undertaking is based on expected cash flows for future, discounted at a rate, which reflects the expected returns and the risks associated with the cash flows as against its accounting profits. The value of the undertaking is determined as the present value of its future free cash flows.

Free cash flows are discounted for the explicit forecast period and the perpetuity value thereafter. Free cash flows represent the cash available for distribution to both, the owners and creditors of the business.

Discount rate is the Weighted Average Cost of Capital ('WACC'), based on an optimal vis-à-vis actual capital structure. It is appropriate rate of discount to calculate the present value of future cash flows as it considers equity-debt risk and also debt-equity ratio of the firm.

The perpetuity (terminal) value is calculated based on the business's potential for further growth beyond the explicit forecast period. The "constant growth model" is applied, which implies an expected constant level of growth (for perpetuity) in the cash flows over the last year of the forecast period.

The discounting factor (rate of discounting the future cash flows) reflects not only the time value of money, but also the risk associated with the business's future operations.

The Business/Enterprise Value so derived, is further reduced by value of debt, if any, (net of cash and cash equivalents) to arrive at value to the owners of business. The surplus assets / non-operating assets are also adjusted.

In case of free cash flows to equity, the cash available for distribution to owners of the business is discounted at the Cost of Equity and the value so arrived is the Equity Value before surplus/ non-

operating assets. The surplus assets / non-operating assets are further added to arrive at the Equity Value.

The future earning capability of the business is important, and the management of these companies have provided the future financial projections. Therefore, we have considered DCF Method under Income Approach.

Market Approach

Under the Market approach, the valuation is based on the market value of the company in case of listed companies and comparable companies trading or transaction multiples for unlisted companies. The Market approach generally reflects the investors' perception about the true worth of the company.

i. Market Price Method

Under this method, the market price of an equity share of the company as quoted on a recognized stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the trading. The market value reflects the investors' perception about the true worth of the company.

ii. Comparable Companies Multiple Method

Under the Comparable Companies Multiple ('CCM') method, the value is determined on the basis of multiples derived from valuations of comparable companies, as manifest through stock market valuations of listed companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

To the value of the business so arrived, adjustments need to be made for the value of contingent assets/liabilities, surplus Asset and dues payable to preference shareholders, if any, in order to arrive at the value for equity shareholders.

iii. Comparable Transactions Multiple Method

Under the Comparable Transactions Multiple ('CTM') method, the value of a company can be estimated by analyzing the prices paid by purchasers of similar companies under similar circumstances. This is a valuation method where one will be comparing recent market transactions in order to gauge current valuation of target company. Relevant multiples have to be chosen carefully and adjusted for differences between the circumstances. This valuation approach is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation.

Under Market Approach, we have considered CCM Method and MP Method. We have identified listed comparable companies based on business of each company and thereafter screen selected multiple based on business composition, business description, etc. We have considered Sales multiple of the comparable listed companies. The total equity value so derived is then divided by total number of equity shares for arriving at the value per equity share of companies under CCM Method.

- 7.6. **The shares of all Companies are listed on BSE and NSE and there are regular transactions in their equity shares with reasonable volumes.** We have considered the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulation 2018 as amended from time to time (**'ICDR Regulations'**) for MP Method. Based on our analysis of public domain information about these Companies, we have observed that information related to proposed transaction with these Companies is available in public domain from 10th June 2020 and share price of these companies are affected due to influence of this information. Therefore, 10th June 2020 has been considered as relevant date as per ICDR Regulations.

8. Basis of Fair Equity Share Swap Ratio

- 8.1. The basis of the fair equity share swap ratio for the Proposed Amalgamation would have to be determined after taking into consideration all the factors and methods mentioned hereinabove and to arrive at a final value for the shares of each company. We have considered consistent methods and weights for all these Companies to facilitate the determination of the fair equity share swap ratio.
- 8.2. We have considered it appropriate to assign equal weights to the value arrived in all the three methods.
- 8.3. The shares have been considered on fully diluted basis by giving effect to the outstanding ESOPs which are in the money as well as convertible instruments wherever issued in the companies.
- 8.4. To arrive at the consensus on the fair equity share swap ratio for the Proposed Amalgamation, suitable minor adjustment/rounding off have been done in the values arrived.

1. We understand that the management of the Future Enterprises Limited ("FEL" or "the Client" or "the Company"), Future Consumer Limited ("FCL"), Future Lifestyle Fashions Limited ("FLFL"), Future Retail Limited ("FRL"), Future Supply Chain Solutions Limited ("FSCSL"), Future Market Networks Limited ("FMNL") along with other identified companies together hereinafter referred to as "the Companies" are proposing to enter into a composite scheme of arrangement, which provides the following ("Proposed Transaction"):
 - a) amalgamation of the FCL, FLFL, FRL, FSCL and FMNL (together referred to as "Transferor Companies") with FEL (Step I);
 - b) transfer and vesting of the Logistics & Warehousing Undertaking from Merged FEL to Reliance Retail Ventures Limited ("RRVL") on a Slump Sale basis (Step II-a);

 - d) Preferential Allotment of Preferential Equity Shares and Preferential Warrants to RRVL WOS (Step III).
2. Since the Company is proposing to enter into a composite scheme of arrangement ("the Scheme"), management of the Company has appointed us to calculate preferential issue price of FEL equity shares, to be allotted as per Step III above, after taking into considerations the provisions of para 164(1) and para 166 (g) of the Securities Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018, and after giving effect, if any of, Step I, Step II-a and Step II-b of the Scheme ('Purpose').

3. As per para 164 (1) of the Securities Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018,

- b. *the average of the weekly high and low of the volume weighted average prices of the related equity shares quoted on a recognized stock exchange during the two weeks preceding the relevant date.*

Further, as per SEBI amendment Circular No. SEBI/LAD-NRO/GN/2020/21, para 164 (B) is inserted, which provides an option to consider the following pricing formula for the preferential issue during the period from July 01, 2020 to December 31, 2020

As per para 166 of the Securities Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018, the price determined for a preferential issue in accordance with regulation 164 or regulation 165, shall be subject to appropriate adjustments, if the issuer:

5. We have analyzed the impact of Step I, Step II-a and Step II-b of the Scheme, on the price arrived as per para 164(1) and para 164(B) of Securities Exchange Board of India (Issue of Capital and Disclosure Requirements), 2018 as below:
- a. Impact of Amalgamation: we understand that the merger swap ratio will be at relative fair value of all the Companies, wherein the valuers have adopted consistent methodology and weights for arriving the equity price of each company, on the basis of which the share swap ratio is arrived. Therefore, the amalgamation of all Companies into FEL will not require any adjustment to the FEL price arrived as per para 164(1) and para 164(B) of Securities Exchange Board of India (Issue of Capital and Disclosure Requirements), 2018.
- b. Impact of Slump Sale: The para 166 of Securities Exchange Board of India (Issue of Capital and Disclosure Requirements), 2018, Adjustments in pricing does not refer to adjustment for slump sale transaction. Also, we understand that slump sale of business is at fair value between a willing buyer and a willing seller on arm's length basis. Therefore, the slump sale of business under step II, will not require any adjustment to the FEL price arrived as per para 164(1) and para 164(B) of Securities Exchange Board of India (Issue of Capital and Disclosure Requirements), 2018
6. We understand that, there is no change in the business of FEL apart from what has been considered in the Scheme.

7. Based on the above, the preferential issue price of 1 equity share of INR 2/-fully paid-up of FEL calculated as per para 164(1) of the Securities Exchange Board of India (Issue of Capital and Disclosure Requirements), 2018, and considering Nil adjustment for Step I, Step II-a and Step II-b of the Scheme as evaluated under para 166 of the Securities Exchange Board of India (Issue of Capital and Disclosure Requirements), 2018, is INR 17.63/-.

Sub: Fairness opinion on the Swap Ratio in relation to the Composite scheme of arrangement involving the Amalgamation of Future Consumer Limited with Future Enterprise Limited

In terms of our engagement letter dated August 04, 2020 with Future Consumer Limited (“FCL” / “Company”), FCL has requested ICICI Securities (“I-Sec”) to provide a fairness opinion on the ‘Share Swap Ratio’ in relation to the proposed Amalgamation of FCL into Future Enterprise Limited (“FEL”) under the composite scheme of arrangement (“Scheme”).

BACKGROUND, PURPOSE AND USE OF THIS FAIRNESS OPINION

We understand that the management of FCL is considering the draft Scheme in terms of which FCL will be amalgamated with FEL. As a consideration for the amalgamation, all shareholders of FCL, as of a record date to be determined by the Board of FCL and/or FEL (“Record Date”), shall receive new equity shares of FEL, in accordance with the Share Swap Ratio determined and recommended by an Independent Valuer. FCL, in terms of the Scheme and upon the Scheme coming into effect, shall stand dissolved without winding up and without any further act or deed.

The Board of FCL has appointed BSR & Associates LLP (“Valuer”) to determine and recommend the Share Swap Ratio in terms of the requirements of SEBI CFD/DIL3/CIR/2017/21 dated March 10, 2017, as amended from time to time (“SEBI Circular”). In this connection, we have been requested by the Board of FCL to render an opinion on whether the Share Swap Ratio determined and recommended by the Valuer vide their report dated August 29, 2020, is fair and reasonable to the shareholders of FCL from the financial point of view.

We shall also be providing fairness opinion to Future Retail Limited, Future Lifestyle Fashions Limited, Future Market Networks Limited, Future Supply Chain Solutions Limited and FEL.

As per the Valuer’s recommendation, under the Scheme, the equity shareholders of FCL, as of the Record Date, will receive 9 fully paid up equity shares of FEL with the face value of INR 2/- each for every 10 fully paid up equity shares of FCL with the face value of INR 6/- each.

C. Regulatory Action, if any – disciplinary action taken by SEBI or stock exchanges against the Promoters in last 5 financial years including outstanding action, if any-

1. SEBI on August 8, 2014, passed an adjudication order on a show cause notice (“**SCN**”) issued to RIL for alleged non-disclosure of the diluted earnings per share in the quarterly financial results for the quarters ended June, 2007, September, 2007, December, 2007, March, 2008, June, 2008 and September, 2008 (together, the “**Quarterly Financial Results**”) and imposed a penalty of Rs. 13 crore. On an appeal by RIL, the Securities Appellate Tribunal set aside SEBI’s order and remanded the matter for fresh consideration by SEBI. SEBI issued a fresh SCN dated April 5, 2016 in the matter, alleging incorrect disclosure of the diluted earnings per share. RIL filed a reply to the SCN and attended the personal hearing and filed written submission before the adjudicating officer (“**AO**”). The last hearing before the AO was held on November 22, 2018. Further details sought by the AO were provided in December 2018. After more than 2 years, the AO sent a letter dated March 19, 2021 granting an opportunity to the Company to make additional submissions and personal hearing in the matter. RIL filed additional submissions in the matter. Vide his order dated September 20, 2021. The AO, vide his order dated September 20, 2021, has disposed off the SCN dated April 5, 2016 without any levy of penalty.

- 2(i) On December 16, 2010, SEBI issued a show cause notice (“**SCN**”) to RIL and 12 other entities (together, the “**Noticees**”) in connection with the trades by RIL in the stock exchanges in 2007 in the shares of Reliance Petroleum Limited, then a subsidiary of RIL. Hearings were held before the Whole Time Member (“**WTM**”) of SEBI in respect of SCN. By an order dated March 24, 2017, the WTM of SEBI held that the actions of RIL and other 12 noticees constituted a violation of the provisions of section 12A of Securities and Exchange Board of India Act, 1992 read with regulations 3, 4(1) and 4(2)(e) of the SEBI (Prohibition of Fraudulent and Unfair Trade Practices relating to Securities Market) Regulations, 2003 and the other 12 noticees violated provisions of the SEBI circular No. SMDRP/DC/CIR-10/01 dated November 2, 2001 and NSE circular No. NSE/CMPT/2982 dated November 7, 2001. WTM passed the directions: (i) prohibiting the Noticees from dealing in equity derivatives in the ‘Futures & Options’ segment of stock exchanges, directly or indirectly, for a period of one year from the date of the order; and (ii) to RIL to disgorge an amount of Rs. 447.27 crore along with interest at the rate of 12% per annum from November 29, 2007 till the date of payment. In May 2017, RIL and the other noticees filed an appeal before the Securities Appellate Tribunal (“**SAT**”) against this order. SAT, by a majority order (2:1), dismissed the appeal on November 5, 2020 and directed RIL to pay the disgorged amount within sixty days from the date of the order. The appeal of RIL and other noticees has been admitted by the Hon’ble Supreme Court of India. By its order dated December 17, 2020, the Hon’ble Supreme Court of India has directed RIL to deposit Rs. 250 crore in the Investors’ Protection Fund, subject

to the final result of the appeal and has stayed the recovery of the balance, inclusive of interest, pending the appeal. RIL has complied with the order dated December 17, 2020 of the Hon'ble Supreme Court of India.

- 2(ii) In the very same matter, on November 21, 2017, SEBI issued show cause notice, inter alia, to RIL, asking RIL to show cause as to why inquiry should not be held in terms of SEBI (Procedure for Holding Inquiry and Imposing Penalties by Adjudicating Officer) Rules, 1995 and penalty not be imposed under the provisions of the Securities and Exchange Board of India Act, 1992. The Adjudicating Officer of SEBI passed an order on January 1, 2021 imposing a penalty of Rs. 25 crore on RIL. RIL has filed an appeal before the SAT against this order.
3. SEBI had issued a show cause notice dated November 26, 2015 to RIL alleging that it had not provided the information sought by SEBI regarding categorization of the Directors as on January 07, 2000. The Adjudicating Officer, vide order dated February 28, 2018, disposed of the adjudication proceedings initiated against RIL without imposition of any penalty.
- 4 RIL had issued debentures with convertible warrants in the year 1994 and allotted equity shares against the warrants in the year 2000. In this matter, SEBI had filed a complaint on July 16, 2020 inter alia against RIL before the Special Court, Mumbai, for taking cognizance of alleged offences under Regulations 3, 5 and 6 of SEBI (Prohibition of Fraudulent and Unfair Trade Practices relating to Securities Market) Regulations, 1995 and section 77(2) and section 77A of Companies Act 1956. The Special Court, Mumbai, vide order dated September 30, 2020, dismissed SEBI's complaint as barred by limitation. Against the said order of the Special Court, SEBI has filed a revision application before the Hon'ble High Court, Bombay and the same is pending.

D. Brief details of outstanding criminal proceedings against RIL:

I. Proceedings initiated by regulatory, statutory and governmental authorities:

1. The Central Bureau of Investigation, Economic Offences Wing, Mumbai ("**CBI**") registered a FIR against RIL and officers of National Insurance Company Limited ("**NICL**"), upon taking cognizance of a complaint dated November 11, 2005 ("**Original Complaint**") filed by Shri P.R. Verma, the then Assistant Manager and Vigilance Officer, NICL with CBI. The Original Complaint alleged that from 2002 to 2005, RIL had allegedly made wrongful pecuniary gains in relation to certain insurance policies, to the detriment of National Insurance Company Limited. Based on the FIR, the Additional Sessions Judge, City Civil and Sessions Court, Mumbai, passed an order issuing process in the Original Complaint. RIL has filed a criminal application before the Court of Special Judge for Greater Mumbai ("**Special Judge**"), *inter alia*, seeking discharge from the proceedings in the Original Complaint, on the grounds that no specific case had been made out against RIL. The matter is currently pending.

Simultaneously, RIL has also filed a criminal application before the Bombay HC challenging continuation of the proceedings before the Special Judge, alleging that the appointment of the Special Judge was violative of the Prevention of Corruption Act, 1988. The Bombay HC has, from time to time, granted ad-interim relief and stayed the proceeding before the Special Judge. The matter is currently pending.

2. The Serious Fraud Investigation Office, Ministry of Corporate Affairs, Government of India ("**SFIO**") had filed a complaint with the Additional Chief Metropolitan Magistrate, Special Acts, Tis Hazari Court ("**Metropolitan Magistrate**") against certain persons and entities for alleged violations of provisions of the Companies Act, 1956 and alleged commission of offences under Sections 120-B, 403, 420 and 477A of the IPC. The Metropolitan Magistrate took cognizance of the complaint, alleging that RIL was a beneficiary of certain allegedly fictitious/irregular 'accommodation entries' made by the accused, and issued summons to RIL. The matter is currently pending.

3. A complaint was filed against RIL and others before the Economic Offences Wing, Delhi (“**EoW**”) and a criminal case was filed thereafter, before the Chief Metropolitan Magistrate, South east, District Court, Saket (“**CMM**”), alleging non-payment of dues for work orders carried out by the complainant for Reliance Jio Infocomm Limited. On February 16, 2019, the CMM passed an order (“**CMM Order**”) directing the EoW to lodge a FIR against RIL and others. On February 18, 2019, a FIR was lodged by the EoW under Sections 406, 420 and 120-B of the IPC. RIL filed petitions before the High Court of Delhi (“**Delhi HC**”) seeking quashing of the FIR and all consequent proceedings emanating therefrom. On March 27, 2019, the Delhi HC passed orders staying the proceedings pursuant to the CMM Order till the next date of hearing. The matter is currently pending.
4. In 2014, four individuals filed a complaint with the Chief Minister of the Government of National Capital Territory of Delhi (“**Delhi Government**”) alleging collusion between the then Ministers of the Central Government of India (“**Central Government**”) and RIL in relation to increasing the price of gas produced by RIL from the KG-D6 block. The then Chief Minister of Delhi had ordered the Anti-Corruption Bureau, Delhi Government (“**ACB**”) to register the FIR and investigate the matter.

RIL filed a writ petition before the Delhi HC questioning the jurisdiction of the ACB in registering the FIR against RIL. The matter is currently pending before the Delhi HC.

II. Proceedings initiated by others

1. A shareholder (“Complainant”) filed a complaint (“Complaint”) inter alia against RIL before the Metropolitan Magistrate, 23rd Court at Esplanade, Mumbai (“Magistrate Court”), for alleged delay in furnishing certain information and registers required to be maintained under the Companies Act, 1956. In response to the orders of the Magistrate Court, issuing process and summons pursuant to the Complaint (“Magistrate Court Orders”), RIL filed an application before the High Court of Bombay (“Bombay HC”) challenging the Magistrate Court Orders, on the grounds that the information/ documents sought by the Complainant had already been provided to him and accordingly, no violation of the applicable provisions of the Companies Act, 1956, could be made out against RIL and others. The Bombay HC, by way of its order dated July 9 2015, stayed the proceedings before the Magistrate Court with interim relief being extended from time to time. The matter is currently pending.
2. A complaint was filed inter alia against RIL before the Special Judicial 1st Class Magistrate for Prohibition and Excise, Kakinada (“Special Magistrate”), alleging purchase and sale of the complainant’s land, despite knowledge of the complainant’s rights to the said land and pending litigation of the complainant with respect to the said property. The Special Magistrate dismissed the complaint against RIL, which dismissal has been challenged by the complainant by filing a quashing application with the High Court of Hyderabad. The matter is currently pending.
3. A complaint (“Complaint”) was filed inter alia against RIL before the Metropolitan Magistrate, 4th Court at Girgaon (“Magistrate Court”) under Sections 420, 463, 467, 499 and 500 of the Indian Penal Code, 1860 (“IPC”) on July 23, 2004, alleging wrongful billing and criminal intimidation of the complainant. A process order was issued in the Complaint on August 19, 2004. On October 16, 2004, a criminal writ petition was filed by RIL before the Bombay HC, seeking to quash the complaint and the order of the Magistrate Court issuing process. The Bombay HC, by way of its order dated March 16, 2006, stayed the proceeding at the Magistrate Court. The matter is currently pending.

Independent Auditor's Review Report on the Quarterly Unaudited Standalone Financial Results of the Company Pursuant to the Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended

Review Report to
The Board of Directors
Future Consumer Limited

1. We have reviewed the accompanying statement of unaudited standalone financial results of Future Consumer Limited (the "Company") for the quarter ended June 30, 2021 (the "Statement") attached herewith, being submitted by the Company pursuant to the requirements of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended (the "Listing Regulations").
2. This Statement, which is the responsibility of the Company's Management and approved by the Company's Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34, (Ind AS 34) "Interim Financial Reporting" prescribed under Section 133 of the Companies Act, 2013 as amended, read with relevant rules issued thereunder and other accounting principles generally accepted in India. Our responsibility is to express a conclusion on the Statement based on our review.
3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the Institute of Chartered Accountants of India. This standard requires that we plan and perform the review to obtain moderate assurance as to whether the Statement is free of material misstatement. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
4. Based on our review conducted as above, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in accordance with the recognition and measurement principles laid down in the aforesaid Indian Accounting Standards ('Ind AS') specified under Section 133 of the Companies Act, 2013 as amended, read with relevant rules issued thereunder and other accounting principles generally accepted in India, has not disclosed the information required to be disclosed in terms of the Listing Regulations, including the manner in which it is to be disclosed, or that it contains any material misstatement.

Notes:

- 1 The Company is engaged in the business of Branding, Manufacturing, Processing, Selling and Distribution of "Consumer Products" which constitutes a single reporting segment. Hence there is no separate reportable segment as per Indian Accounting Standard - 108 Operating Segments'.
- 2 During the quarter, the Company has infused additional investments of Rs. 550 lakhs in Fonterra Future Dairy Private Limited.
- 3 During the quarter there was no acquisition of treasury shares by the ESOP trust or issue of shares due to exercise of stock options.
- 4 The COVID-19 pandemic is unprecedented, and the Company has experienced its adverse impact. The Company has faced issues in supply chain, warehousing, packing centres, administrative offices, etc. which has adversely affected the operations of the Company including its ability to be consistent with supplies and sales and which in turn has also impacted liquidity position of the Company. While the Company continues to work very closely with all the stakeholders, the situation continues to be still evolving.

The Company has incurred loss before tax during the quarter ended June 30, 2021 primarily owing to the lower volumes, finance costs and depreciation. The Company has adopted several cost reductions measures to address the liquidity crunch to maintain sufficient operational cash flows. The Company has invoked One Time Restructuring (OTR) of loans on November 09, 2020 as per RBI guidelines which has been approved by all the lenders on May 06, 2021; and entered into an agreement with debenture trustees of A K Capital and CDC Emerging Markets on April 05, 2021 and May 04, 2021, respectively, for deferment of repayments of Non-Convertible Debentures.

The Company, as at the date of approval of these financial results, has relied on available internal and external sources of information and indicators of economic forecasts, including the impact of Covid-19 while assessing the carrying amounts of current and non-current assets and its repayment obligations on a timely basis up to the date of approval of these financial results. However, the future impact of the global health pandemic and other events may be different from that estimated as at the date of approval of these financial results and the Company will continue to closely monitor any material changes to future economic conditions.

- 5 The Board of Directors of the Company at its meeting held on August 29, 2020 approved the Composite Scheme of Arrangement ("the Scheme") which involves: (i) merger of Future Consumer Limited ("the Company"), and other 18 Transferor Companies with Future Enterprises Limited ("FEL" or "Transferee Company") (ii) Transfer and vesting of the Logistics & Warehousing Undertaking from FEL as a going concern on a slump sale basis to Reliance Retail Ventures Limited ("RRVL"); (iii) Transfer and vesting of Retail & Wholesale Undertaking from FEL as a going concern on a slump sale basis to Reliance Retail and Fashion Lifestyle Limited, a wholly owned subsidiary of RRVL ("RRVL WOS"); and (iv) Preferential allotment of equity shares and warrants of FEL to RRVL WOS, pursuant to Sections 230 to 232 and other relevant provisions of the Companies Act, 2013. The combination contemplated under the Scheme has been approved by Competition Commission of India on November 20, 2020. Further stock exchanges have issued observation letter without any adverse observation on January 20, 2021. Pursuant to this, the Scheme has been filed with National Company Law Tribunal Mumbai (NCLT) on January 26, 2021.

Amazon.com Investment Holdings LLC. (Amazon) has initiated arbitration against Future Retail Limited (FRL, a party to the Scheme) and its promoters on October 5, 2020 before Singapore International Arbitration Centre (SIAC). Emergency Arbitrator (EA) has passed an interim order on October 25, 2020 (EA Order) inter alia restraining FRL and promoters from taking any steps in furtherance of the resolution passed on August 29, 2020.

Both, FRL and Amazon have filed suit/challenged each other's position relating to the Scheme/ EA Order in various courts of India and the matter is sub-judice and currently pending with Indian Courts for disposal.

The Supreme Court has pronounced its judgment on August 6, 2021 (SC Judgment) wherein it has inter alia held that an order passed by an emergency arbitrator is an order under section 17(1) of the Act. FRL has further informed in its intimation to stock exchanges that FRL intends to pursue all available avenues to conclude the deal to protect the interests of its stakeholders and workforce.

Further in relation to the Arbitration Proceedings, a Tribunal has been constituted by SIAC on January 5, 2021 and FRL has filed two applications before the Tribunal, first being an application under section 16 of the Act challenging the jurisdiction of the Tribunal; and second being an Application under Rule 10 of Schedule I of SIA Rules for vacation of the EA Order. The hearing for both the application was concluded on July 16, 2021 and verdict of the Tribunal is awaited on the said applications.

NCLT has heard the application relating to the Scheme and the intervention application filed by Amazon and has reserved the order on the said application filed by Amazon.

- 6 The Company has invoked One Time Restructuring (OTR) of loan from banks on November 09, 2020 as per RBI guidelines vide circular DOR.No.BP.BC/3/21.04.048/2020-21 dated August 6, 2020 on 'Resolution Framework for COVID-19 related stress' and follow on circular vide DOR.No.BP.BC/13/21.04.048/2020-21 dated September 7, 2020 on 'Resolution Framework for COVID-19-related Stress - Financial Parameters'. The aforesaid OTR has been approved by all the lenders on May 06, 2021. Accordingly, the repayment of loans is extended, bills discounted have been converted into working capital term loan, penal interest is waived, and interest accrued has been converted into loan. Further, the Company has entered into an agreement with debenture trustees of A K Capital and CDC Emerging Markets on April 05, 2021 and May 04, 2021, respectively for deferment of repayments of Non-Convertible Debentures

Accordingly, the approval of One Time Restructuring and signing of agreement with debenture trustees has the following impact on the Company's working capital position:

- Limits of Short-Term Borrowings (Working Capital Demand Loan and Cash Credit) to continue as per existing limits;
- Interest moratorium on all facilities with lenders participating in the OTR till September 2021 and creation of funded interest term loan on the same along with any unpaid interest as on the date of implementation;
- Outstanding bills discounted as at November 09, 2020 have been converted into Working Capital Term Loan repayable from June 2022 onwards;
- Extension of tenure of term loans by up to 24 months and moratorium of principal repayment till February 2023;
- NCDs due of Rs. 2,000 lakhs along with interest thereon have been repaid in instalments up to June 2021;
- Principal and interest due on remaining NCDs till August 2021 repayable in instalments till May 2022;

- 7 Government of India's Code for Social Security 2020 (the 'Code') received assent from the President in September 2020. However, the date from when the Code will become applicable and the rules have not yet been notified. - 8 The figures for the corresponding previous period have been regrouped/reclassified wherever necessary, to make them comparable.
- 9 The above results were reviewed by the Audit Committee and approved by the Board of Directors at their meetings held on August 13, 2021.

The combination contemplated under the scheme has been approved by Competition Commission of India on November 20, 2020. Further stock exchanges have issued observation letter without any adverse observation on January 20, 2021. Pursuant to this the scheme application has been filed with National Company Law Tribunal Mumbai (NCLT) on January 26, 2021 for convening the meeting of the Shareholders and Creditors of the Transferor Companies and Transferee Company. NCLT has heard this Application and the intervention application filed by Amazon.com Investment Holdings LLC. (Amazon) and has reserved the order on the said application filed by Amazon.

Amazon has initiated arbitration proceedings against the FRL and its promoters (including Future Coupons Private Limited (FCPL)) on October 5, 2020 before Singapore International Arbitration Centre ("SIAC"). On the same day, Amazon had also filed a Claimant's application for seeking emergency reliefs ("CAER"). After completion of the hearing of CAER, Emergency Arbitrator passed an interim order on October 25, 2020 ("EA Order") inter alia restraining the Respondents therein i.e. FRL and promoters (including FCPL) to take any steps in furtherance of the resolution passed by FRL on August 29, 2020. However, based on the legal advice received by FRL, it had contended that the EA Order would not be enforceable in view of FRL being not a signatory to the arbitration agreement between Amazon and FCPL & other Promoters under which arbitration has been initiated.

In terms of the information provided by FRL, a party to the composite scheme of arrangement, it has filed a suit before Hon'ble Delhi High Court making a prayer to injunct Amazon from tortuously interfering with the scheme. The Hon'ble Single Judge of the Delhi High Court has passed a Judgment in the Interim Application in the Suit, on December 21, 2020 (Judgment), wherein it has prima facie held –

- (a) that there is no arbitration agreement between Amazon and FRL;
- (b) FRL's Resolution dated August 29, 2020 approving the scheme is neither void nor contrary to any statutory provision nor the Articles of Association of FRL;
- (c) that Amazon's representations to various regulatory authorities amounted to unlawful interference with the Scheme and a civil wrong actionable by both FRL and Reliance in case they suffer any loss and
- (d) no injunction was granted and all the Statutory Authorities were directed to take the decision on the objections in accordance with the law.

The Hon'ble Court also prima facie held that conflation of the two shareholders agreements will be in violation of FEMA FDI Rules. An Appeal was preferred by Amazon against certain observations contained in this Judgment

In another application of Amazon under section 17(2) of Arbitration & Conciliation Act, 1996 ("the Act") to enforce EA Order, Hon'ble Delhi High Court vide its interim order dated February 2, 2021 directed the parties to maintain status quo ("Status Quo Order"), further on March 18, 2021 a detailed order was passed by the Single Judge of the High Court ("Detailed Order") inter alia confirming the directions in the Status Quo Order, granting further reliefs in favour of Amazon, and inter alia restricting all respondents from taking any further action in violation of the EA Order. FRL has filed, appeals against both the above orders, before the Hon'ble Division Bench and has obtained a stay on the Status Quo Order and the Detailed Order by orders dated February 08, 2021 and March 22, 2021 respectively. Amazon has filed special leave petitions against both the above order of the Hon'ble Division Bench and the Hon'ble Supreme Court after hearing both sides have on August 6, 2021 has held that the EA order is an order under section 17(1) of the Act.

FRL has further informed in its intimation to stock exchanges that FRL intends to pursue all available avenues to conclude the deal to protect the interests of its stakeholders and workforce.

Further in relation to the Arbitration Proceedings, a Tribunal has been constituted by SIAC on January 5, 2021 and FRL has filed two applications before the Tribunal, first being an application under section 16 of the Act challenging the jurisdiction of the Tribunal, and second being an Application under Rule 10 of Schedule I of SIA Rules for vacation of the EA Order. The hearing for both the application was concluded on July 16, 2021 and verdict of the Tribunal is awaited on the said applications.

Notes to the financial results:

- 1 The above unaudited standalone financial results of the Company for the quarter ended June 30, 2021, have been reviewed by the Audit Committee and were thereafter approved by the Board of Directors of the Company at its meeting held on August 10, 2021. The Statutory Auditors of the company have reviewed the results and have expressed an unmodified opinion thereon.
- 2 This statement has been prepared in accordance with Companies (Indian Accounting Standards) Rules, 2015 (Ind AS) prescribed under section 133 of the Companies Act, 2013 and other recognised accounting practices and policies to the extent applicable.
- 3 The Board of Directors of the Company at its meeting held on August 29, 2020 has inter-alia, considered and approved the Composite Scheme of Arrangement which involves:
 - (i) merger of Future Market Networks Limited ("the Company" or Transferor Company 3"), and other 18 Transferor Companies including Future Retail Limited ("FRL") with Future Enterprises Limited ("FEL" or "Transferee Company") and their respective Shareholders and Creditors;
 - (ii) Transfer and vesting of the Logistics & Warehousing Undertaking from FEL as a going concern on a slump sale basis to Reliance Retail Ventures Limited ("RRVL");
 - (iii) Transfer and vesting of the Retail & Wholesale Undertaking from FEL as a going concern on a slump sale basis to Reliance Retail and Fashion Lifestyle Limited, a wholly owned subsidiary of RRVL ("RRVL WOS"); and
 - (iv) Preferential allotment of equity shares and warrants of FEL to RRVL WOS ("The Composite Scheme of Arrangement"/ Scheme), pursuant to Sections 230 to 232 and other relevant provisions of the Companies Act, 2013.

The combination contemplated under the scheme has been approved by Competition Commission of India on November 20, 2020. Further stock exchanges have issued observation letter without any adverse observation on January 20, 2021. Pursuant to this the scheme application has been filed with National Company Law Tribunal Mumbai (NCLT) on January 26, 2021 for convening the meeting of the Shareholders and Creditors of the Transferor Companies and Transferee Company. NCLT has heard this Application and the intervention application filed by Amazon.com Investment Holdings LLC. (Amazon) and has reserved the order on the said application filed by Amazon.

Amazon has initiated arbitration proceedings against Future Coupons Private Limited ("FCPL"), FRL and its promoters on October 5, 2020 before Singapore International Arbitration Centre ("SIAC"). On the same day, Amazon had also filed a Claimant's application for seeking emergency reliefs ("CAER").

After completion of the CAER the Emergency Arbitrator passed an interim order on October 25, 2020 ("EA Order") inter alia restraining the Respondents therein i.e. FCPL, FRL and Promoters from taking any steps in furtherance of the resolution passed on August 29, 2020. However, based on the legal advice received by FRL, it had contended that the EA Order would not be enforceable in view of FRL not being a signatory to the arbitration agreement between Amazon and FCPL & Promoters, under which arbitration has been initiated.

In terms of the information provided by FRL, a party to the composite scheme of arrangement, it has on November 06, 2020 filed a suit before Hon'ble Delhi High Court seeking a relief to injunct Amazon from tortuously interfering with the Scheme. The Hon'ble Single Judge of the Delhi High Court has passed a judgment in the interim application in the Suit, on December 21, 2020 (Judgment), wherein the Single Judge of the Delhi High Court has prima facie held the following:

- (a) That there is no arbitration agreement between Amazon and FRL;
- (b) That FRL's Resolution dated August 29, 2020 approving the scheme is neither void nor contrary to any statutory provision nor the Articles of Association of FRL;
- (c) That conflation of the two shareholders agreements (i.e. FCPL SHA and FRL SHA) will be in violation of FEMA FDI Rules;
- (d) That Amazon's representations to various regulatory authorities amounted to unlawful interference with the Scheme and a civil wrong actionable by both FRL and Reliance in case they suffer any loss and
- (e) Even though an injunction was not granted and all the Statutory Authorities were directed to take the decision on the objections in accordance with the law.

An appeal was preferred by Amazon ("Amazon's Appeal") against certain observations contained in this Judgment, which is currently pending before the Division Bench of the Delhi High Court. On 13 January 2021, even though notice has been issued in Amazon's Appeal, no stay has been granted by the Division Bench on the said Judgment.

In another application made by Amazon under section 17(2) of Arbitration & Conciliation Act, 1996 ("the Act") to enforce EA Order, Hon'ble Delhi High Court vide its interim order dated February 2, 2021 directed the parties to maintain status quo (Status Quo Order). On March 18, 2021 a detailed order was passed by the Single Judge of the High Court (Detailed Order) inter alia confirming the directions in the Status Quo Order passed by Hon'ble Delhi High Court in the application under section 17(2) of the Act granting further reliefs in favour of Amazon, and inter alia restricting all respondents from taking any further action in violation of the EA Order. FRL has filed appeals against both the above orders before the Hon'ble Division Bench of Delhi High Court and has obtained a stay on the Status Quo Order and the Detailed Order by orders dated February 08, 2021 and March 22, 2021 respectively.

Amazon has in turn preferred Special Leave Petitions before Hon'ble Supreme Court against the respective stay orders granted by the Hon'ble Division Bench. The Supreme Court has pronounced its judgment on August 6, 2021 (SC Judgment) wherein it has inter alia held that an order passed by an emergency arbitrator "are referable to and are made under Section 17 (1) of the Act". By virtue of the said SC Judgment, the stay granted by the Division Bench of the Delhi High Court by orders dated February 08, 2021 and March 22, 2021 also stand vacated.

FRL has further informed in its intimation to stock exchanges that FRL intends to pursue all available avenues to conclude the deal to protect the interests of its stakeholders and workforce.

Further in relation to the Arbitration Proceedings, a Tribunal has been constituted by SIAC on January 5, 2021 and FRL has filed two applications before the Tribunal, first being an application under section 16 of the Act challenging the jurisdiction of the Tribunal, and second being an Application under Rule 10 of Schedule I of SIA Rules for vacation of the EA Order. The hearing for both the application was concluded on July 16, 2021 and verdict of the Tribunal is awaited on the said applications.

Additionally, on August 08, 2021 FRL has also filed its Statement of Defence in response to the contentions raised by Amazon in its Statement of Claim.

Independent Auditor's Review Report on the Quarterly Unaudited Standalone Financial Results of the Company Pursuant to the Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended

**To,
Board of Directors of
Future Retail Limited**

Report on the audit of the Standalone Financial Results

Opinion

1. We have reviewed the accompanying statement of unaudited standalone financial results of Future Retail Limited (the "Company") for the quarter ended June 30, 2021 (the "Statement") attached herewith, being submitted by the Company pursuant to the requirements of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended (the "Listing Regulations").
2. This Statement, which is the responsibility of the Company's Management and approved by the Company's Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34, (Ind AS 34) "Interim Financial Reporting" prescribed under Section 133 of the Companies Act, 2013 as amended, read with relevant rules issued thereunder and other accounting principles generally accepted in India. Our responsibility is to express a conclusion on the Statement based on our review.
3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the Institute of Chartered Accountants of India. This standard requires that we plan and perform the review to obtain moderate assurance as to whether the Statement is free of material misstatement. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

5. Emphasis of Matter

We draw attention to Note 2 of the Statement which describes management's assessment of the impact of the COVID-19 pandemic on the Company's operations and carrying value of assets as at June 30, 2021. Our opinion is not modified in respect of this matter.

The Hon'ble Court also prima facie held that conflation of the two shareholders agreements will be in violation of FEMA FDI Rules. An Appeal was preferred by Amazon against certain observations contained in this Judgment.

In another application of Amazon under section 17(2) of Arbitration & Conciliation Act, 1996 ("the Act") to enforce EA Order, Hon'ble Delhi High Court vide its Interim order dated February 02, 2021 directed the parties to maintain status quo ("Status Quo Order") and further on March 18, 2021 a detailed order was passed by the Single Judge of the High Court ("Detailed Order") inter-alia confirming the directions in the Status Quo Order, granting further reliefs in favour of Amazon, and inter-alia restricting all respondents from taking any further action in violation of the EA Order. The Company has filed, appeals against both the above orders, before the Hon'ble Division Bench and has obtained a stay on the Status Quo Order and the Detailed Order by orders dated February 08, 2021 and March 22, 2021 respectively. Independent Auditor's Review Report on the Quarterly and Year to Date Unaudited Standalone Financial Results of the Company pursuant to the Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended

**REVIEW REPORT TO
THE BOARD OF DIRECTORS
FUTURE SUPPLY CHAIN SOLUTIONS LIMITED**

1. We have reviewed the accompanying Statement of Unaudited Standalone Financial Results of **FUTURE SUPPLY CHAIN SOLUTIONS LIMITED** ("the Company") for the quarter ended June 30, 2021 ("the Statement") attached herewith being submitted by the Company pursuant to the requirements of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended (the "Listing Regulation").
2. This statement, which is the responsibility of the Company's Management and approved by the Company's Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34, ('Ind AS 34') "Interim Financial Reporting" prescribed under Section 133 of the Companies Act, 2013, as amended, read with relevant rules issued thereunder and other accounting principles generally accepted in India. Our responsibility is to express a conclusion on the Statement based on our review.
3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the Institute of Chartered Accountants of India, notified under section 133 of the Companies Act, 2013. This standard requires that we plan and perform the review to obtain moderate assurance as to whether the Statement is free of material misstatement. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
4. **Basis for Qualified Conclusion**

Total trade receivables amounting to INR 74,969.05 lakhs includes related party receivables amounting to INR 65,257.71 lakhs as at 30 June, 2021. There have been substantial delays in receipt from customers and subsequent receipts have not been significant. In view of the above, we are unable to obtain sufficient and appropriate audit evidence and are unable to comment on adequacy of loss provision, valuation and recoverability of balance outstanding amounting to INR 74,324.45 lakhs (net of provision INR 644.60 lakhs as at 30 June, 2021).

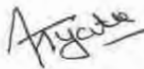

5. Based on our review, except for the possible effects as described in "Basis for Qualified Conclusion" in Para 4 above, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in accordance with the recognition and measurement principles laid down in the applicable Indian Accounting Standards ('Ind AS') specified under Section 133 of the Companies Act, 2013 as amended, read with relevant rules issued thereunder and other accounting principles generally accepted in India, has not disclosed the information required to be disclosed in terms of the Listing Regulations, including the manner in which it is to be disclosed, or that it contains any material misstatement.

6. Emphasis of Matter

We draw attention to Note No. 4 of the statement which describes management's assessment of the impact of the COVID-19 pandemic on the operations and financial results of the Company.

Our conclusion is not modified in respect of this matter.

Notes:

- The above financial results were reviewed by the Audit Committee and were thereafter approved by the Board of Directors of the Company at its meeting held on August 12, 2021. A Limited review of the above results has been carried out by the Statutory Auditors.
- The outbreak of Covid-19 pandemic has created economic disruption throughout the world including India. Consequently the revenue and profitability for the quarter ended June, 2021 has been adversely impacted. The second wave across India has raised concern over economic growth and business conditions, while the restrictions are currently more localized and for shorter duration as compared to the previous year. Moreover, increasing pace of inoculation and efforts by the government are likely to help mitigate some of the adverse impact. In assessing the recoverability of the Receivables, inventories and other financial and non-financial assets, the Company is closely monitoring the development and possible effects on the financial condition, liquidity, operations, and is actively working to minimize the impact of this unprecedented situations. The impact of the pandemic may differ from that estimated as on the date. The Company will continue to closely monitor any material changes to future economic conditions. As the situation is continuously evolving, the eventual impact may differ from the estimates made in financial statements.
- The Board of Directors of the Company at its meeting held on August 29, 2020 has inter-alia, considered and approved the Composite Scheme of Arrangement which involves: (i) merger of 19 Transferor Companies including Future Retail Limited ("FRL") with Future Enterprises Limited ("FEL" or "Transferee Company" "the Company") and their respective Shareholders and Creditors; (ii) Transfer and vesting of the Logistics & Warehousing Undertaking from FEL as a going concern on a slump sale basis to Reliance Retail Ventures Limited ("RRVL"); (iii) Transfer and vesting of the Retail & Wholesale Undertaking from FEL as a going concern on a slump sale basis to Reliance Retail and Fashion Lifestyle Limited, a wholly owned subsidiary of RRVL ("RRVL WOS"); and (iv) Preferential allotment of equity shares and warrants of FEL to RRVL WOS ("The Composite Scheme of Arrangement"/ Scheme), pursuant to Sections 230 to 232 and other relevant provisions of the Companies Act, 2013.

The combination contemplated under the scheme has been approved by Competition Commission of India on November 20, 2020. Further stock exchanges have issued observation letter without any adverse observation on January 20, 2021. Pursuant to this the scheme application has been filed with National Company Law Tribunal Mumbai (NCLT) on January 26, 2021 for convening the meeting of the Shareholders and Creditors of the Transferor Companies and Transferee Company. NCLT has heard this Application and the intervention application filed by Amazon.com Investment Holdings LLC. (Amazon) and has reserved the order on the said application filed by Amazon.

Amazon has initiated arbitration proceedings against the Future Retail Limited (FRL) and its promoters (including Future Coupons Private Limited (FCPL)) on October 5, 2020 before Singapore International Arbitration Centre ("SIAC"). On the same day, Amazon had also filed a Claimant's application for seeking emergency reliefs ("CAER").

After completion of the hearing of CAER, Emergency Arbitrator passed an interim order on October 25, 2020 ("EA Order") inter alia restraining the Respondents therein i.e. FRL and promoters (including FCPL) to take any steps in furtherance of the resolution passed by FRL on August 29, 2020. However, based on the legal advice received by FRL, it had contended that the EA Order would not be enforceable in view of FRL being not a signatory to the arbitration agreement between Amazon and FCPL & other Promoters under which arbitration has been initiated.

In terms of the information provided by FRL, a party to the composite scheme of arrangement, it has filed a suit before Hon'ble Delhi High Court making a prayer to injunct Amazon from tortuously interfering with the scheme. The Hon'ble Single Judge of the Delhi High Court has passed a Judgment in the Interim Application in the Suit, on December 21, 2020 (Judgment), wherein it has prima facie held -

- (a) that there is no arbitration agreement between Amazon and FRL;
- (b) FRL's Resolution dated August 29, 2020 approving the scheme is neither void nor contrary to any statutory provision nor the Articles of Association of FRL.
- (c) that Amazon's representations to various regulatory authorities amounted to unlawful interference with the Scheme and a civil wrong actionable by both FRL and Reliance in case they suffer any loss and
- (d) no injunction was granted and all the Statutory Authorities were directed to take the decision on the objections in accordance with the law.

The Hon'ble Court also prima facie held that conflation of the two shareholders agreements will be in violation of FEMA FDI Rules. An Appeal was preferred by Amazon against certain observations contained in this Judgment.

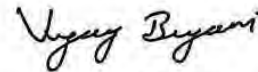

In another application of Amazon under section 17(2) of Arbitration & Conciliation Act, 1996 ("the Act") to enforce EA Order, Hon'ble Delhi High Court vide its interim order dated February 2, 2021 directed the parties to maintain status quo ("Status Quo Order"), further on March 18, 2021 a detailed order was passed by the Single Judge of the High Court ("Detailed Order") inter alia confirming the directions in the Status Quo Order, granting further reliefs in favour of Amazon; and interalia restricting all respondents from taking any further action in violation of the EA Order. FRL has filed, appeals against both the above orders, before the Hon'ble Division Bench and has obtained a stay on the Status Quo Order and the Detailed Order by orders dated February 08, 2021 and March 22, 2021 respectively. Amazon has filed special leave petitions against both the above order of the Hon'ble Division Bench and the Hon'ble Supreme Court after hearing both sides have on August 6, 2021 has held that the EA order is an order under section 17(1) of the Act.

FRL has further informed in its intimation to stock exchanges that FRL intends to pursue all available avenues to conclude the deal to protect the interests of its stakeholders and workforce.

Further in relation to the Arbitration Proceedings, a Tribunal has been constituted by SIAC on January 5, 2021 and FRL has filed two applications before the Tribunal, first being an application under section 16 of the Act challenging the jurisdiction of the Tribunal; and second being an Application under Rule 10 of Schedule I of SIA Rules for vacation of the EA Order. The hearing for both the application was concluded on July 16, 2021 and verdict of the Tribunal is awaited on the said applications.

- 4 Pursuant to RBI guidelines vide circular DOR.No.BP.BC/3/21.04.048/2020-21 dated August 6, 2020 on 'Resolution Framework for COVID-19-related Stress', the lenders of the Company has invoked One Time Restructuring (OTR) with regard to credit facilities availed by the Company from Banks and other Institutions on October 27, 2020. The aforesaid OTR has been implemented by execution of the documents by the Company and eligible lenders on April 23, 2021. Accordingly as per the agreed terms of OTR the repayment of Long Term and Short Term obligation is extended, overdue working capital limits is converted in Working Capital Term Loan (WCTL), and interest due till September, 2021 on various credit facilities has been converted into Funded Interest Term Loan (FITL).
- 5 The figures for the quarter ended March 31, 2021 are the balancing figures between the audited figures in respect of the full financial year ended March 31, 2021 and the unaudited published year-to-date figures up to December 31, 2020.
- 6 Figures for the previous financial period(s) have been re-arranged and re-grouped wherever necessary.
- 7 Historically, the Company has been operating its business under two main segments, viz. Manufacturing & Trading and Leasing & Others. However, during the current year the operations under the segment Leasing and Others business has reduced significantly and hence, now entire business is being reviewed by the management as single operations. Accordingly, no separate segment reporting has been prepared as contemplated under the IND-AS 108.

INDEPENDENT AUDITOR'S REVIEW REPORT ON REVIEW OF INTERIM STANDALONE FINANCIAL RESULTS

**To The Board of Directors of
Reliance Retail Ventures Limited**

Introduction

1. We have reviewed the accompanying statement of "Unaudited Standalone Financial Results for the quarter ended 30 June 2021" ("the Statement") of **Reliance Retail Ventures Limited** ("the Company").
2. This Statement, which is the responsibility of the Company's Management and approved by the Company's Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in the Indian Accounting Standard 34 "Interim Financial Reporting" ("Ind AS 34") prescribed under Section 133 of the Companies Act, 2013 read with relevant rules issued thereunder and other accounting principles generally accepted in India. This Statement has been prepared solely for submission to Reliance Industries Limited ("the Ultimate Parent Company") for the preparation of its consolidated financial results in terms of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended. Our responsibility is to express a conclusion on the Statement based on our review.

Scope of Review

3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410, 'Review of Interim Financial Information Performed by the Independent Auditor of the Entity', issued by the Institute of Chartered Accountants of India ("ICAI"). A review of interim financial information consists of making inquiries, primarily of the Company's personnel responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing specified under section 143(10) of the Companies Act, 2013 and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

4. Based on our review conducted as stated in paragraph 3 above, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in accordance with the recognition and measurement principles laid down in the aforesaid Indian Accounting Standards and other accounting principles generally accepted in India, has not disclosed the information required to be disclosed in terms of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended, to the extent applicable to the Company, including the manner in which it is to be disclosed to enable the Ultimate Parent Company to prepare its consolidated financial results, or that it contains any material misstatement.

Deloitte Haskins & Sells LLP

Other Matter

5. The comparative unaudited standalone financial results of the Company for the quarter ended 30 June 2020 prepared in accordance with Ind AS included in this Statement has been reviewed by the predecessor auditor whose report dated 30 July 2020 expressed an unmodified conclusion on those unaudited standalone financial results. Our conclusion on the Statement is not modified in respect of this matter.

Restriction on Use

6. For the reasons mentioned in paragraph 2 above, the Statement is not suitable for any other purpose.
